

MACQUARIE PROFESSIONAL SERIES

IPM Global Macro Fund

Product Disclosure Statement

ARSN 617 257 717
APIR code MAQ8243AU

Macquarie Investment Management Australia Limited
ABN 55 092 552 611 AFSL 238321

DATE OF ISSUE / 1 JULY 2020

Issuer: Macquarie Investment Management Australia Limited
ABN 55 092 552 611 AFSL No. 238321

Other than Macquarie Bank Limited (MBL), none of the entities noted in this document are authorised deposit-taking institutions for the purposes of the Banking Act 1959 (Commonwealth of Australia). The obligations of these entities do not represent deposits or other liabilities of MBL. MBL does not guarantee or otherwise provide assurance in respect of the obligations of these entities, unless noted otherwise.

This Supplementary Product Disclosure Statement dated 19 March 2021 (**Supplementary PDS**) is supplemental to the Product Disclosure Statement (**PDS**), dated 1 July 2020, for the IPM Global Macro Fund (**Fund**). The PDS, any previous Supplementary Product Disclosure Statements or updates and this Supplementary PDS should be read together.

With effect from 16 April 2021 (**Effective Date**), the Fund will make the following changes:

a. Expand the investable universe

From the Effective Date, in addition to its current derivatives exposure to exchange-traded government bond, equity index and equity volatility index futures contracts, and over-the-counter foreign exchange forward contracts, the investable universe of the Fund will expand to include futures contracts providing exposure to commodities and over-the-counter interest rate swaps.

b. Change to the investment limits

Additionally, from the Effective Date, the investment limits applied to the Fund's exposure to each asset class along with the exposure per individual contract and the maximum allowable leverage limit will be removed in order to make it easier for the Fund to incorporate the ongoing research and investment ideas of the investment manager (**IPM**) into the Fund in a timely manner in the future. IPM will continue to apply internal limits and guidelines to manage the derivatives exposure of the Fund, and these will continue to be monitored by Macquarie Investment Management Australia Limited as responsible entity of the Fund.

As a result, the PDS will be amended as follows on the Effective Date:

1. The following changes will be made in the 'IPM Global Macro Fund at a glance' section of the PDS:

a. The content in the row entitled 'Valuation of non-exchange traded assets' will be replaced with the following:

Valuation of non-exchange traded assets	<p>The Fund aims to generate long-term absolute returns by investing in exchange-traded and over-the-counter derivatives (OTC derivatives) that provide exposure to government bonds, commodities, equity indices, equity volatility indices, developed market and emerging market currencies, and interest rates. The Fund also holds cash and cash equivalents.</p> <p>This benchmark addresses whether valuations of the Fund's non-exchange traded assets are provided by an independent administrator or an independent valuation service provider. The Fund's non-exchange traded assets are the OTC derivatives that it holds. The Fund does not meet this benchmark as we have not appointed an independent administrator or independent valuation service provider to value the Fund's non-exchange traded assets.</p> <p>However:</p> <ul style="list-style-type: none"> the OTC derivatives are typically valued by Macquarie based on independent sources of data published by third party providers, and Macquarie has expertise and experience in financial risk modelling and valuing financial products and other assets types, including non-exchange traded assets. Macquarie has in place valuation methods and policies which describe how non-exchange traded assets and liabilities are to be classified and the methodology to be used to value those assets and liabilities. These methods and policies are consistent with acceptable industry standards. <p> Refer to Section 1.4 of this PDS for more information in relation to valuation of the Fund's assets.</p>
---	---

b. The content in the row entitled 'Investment manager' will be replaced with the following:

Investment manager	<p>IPM Informed Portfolio Management AB (IPM, Investment Manager) has been appointed to manage the Fund's derivatives exposure on a discretionary basis.</p> <p>Macquarie Investment Management Global Limited (Cash Manager) has been appointed to manage the cash investments of the Fund in excess of margin requirements.</p> <p> Refer to Section 1 of this PDS for more information.</p>
--------------------	---

c. The content in the row entitled 'Investment objective and strategy' will be replaced with the following:

Investment objective and strategy	<p>The Fund aims to generate long-term absolute returns by investing in exchange-traded and over-the-counter derivatives (OTC derivatives) that provide exposure to government bonds, commodities, equity indices, equity volatility indices, developed market and emerging market currencies, and interest rates. The Fund also holds cash and cash equivalents.</p> <p>The Fund may hold both long and short exposures to the underlying assets through futures, over-the-counter foreign exchange forwards or over-the-counter interest rate swaps.</p> <p>IPM's investment process involves the use of models to determine the positions held by the Fund. The models are based on economic theory and rely on the belief that asset prices fluctuate around the true fundamental value of financial assets. The implementation of the investment process is systematic, which means that the vast majority of the Fund's portfolio exposures are based on the output of the model.</p> <p> Refer to Section 2 of this PDS for more information on the investment strategy and process.</p>
-----------------------------------	---

d. The fourth bullet point in the row entitled 'Fund structure' is replaced with the following:

- Morgan Stanley & Co. International plc (**Morgan Stanley**), the futures clearing broker and OTC foreign exchange derivatives prime broker for the Fund, and

e. The content in the row entitled 'Valuation, location and custody of assets' will be replaced with the following:

Valuation, location and custody of assets	<p>Valuation of the Fund's assets</p> <p>The Fund's assets are normally valued at their most recent market value, using independent pricing sources where available for the particular asset type and in accordance with industry standards. Futures are generally valued by reference to the exchange settlement price and cash is valued at its face value with the addition of accrued interest.</p> <p>The Fund's non-exchange traded assets are OTC derivatives, which are typically valued by Macquarie based on independent sources of data published by third party providers.</p> <p> Refer to Section 1.4 of this PDS for more information.</p> <p>Location and custody of the Fund's material assets</p> <p>The Fund may invest in any futures markets globally. The futures, OTC derivatives and underlying assets may be located in any jurisdiction worldwide and denominated in any currency. The Fund may invest in any developed market and emerging market currencies.</p> <p>The cash holdings of the Fund, in excess of margin requirements, will generally be denominated in Australian dollars and will be held in bank accounts with Australian authorised deposit-taking institutions, or such other cash or cash equivalent investments as determined by the Cash Manager from time to time. The margin for the Fund's futures and OTC derivatives is held with Morgan Stanley, the futures exchange clearing broker, clearing house or Citi. The margin may be denominated in currencies other than Australian dollars.</p> <p>Citi has been appointed as the custodian of the Fund. However, the futures and OTC derivatives contracts, and the majority of the Fund's cash, are held in the name of Macquarie in its capacity as the responsible entity of the Fund.</p> <p> Refer to Section 2 of this PDS for more information.</p>
---	---

f. The first and second paragraphs in the row entitled 'Leverage' will be replaced with the following:

The Fund uses leverage, which is inherent in futures and OTC derivatives contracts, to implement the investment strategy although it does not physically borrow to leverage. Leverage generally provides a much larger exposure to the underlying assets with a relatively small initial outlay. The Fund, therefore, will often have a gross market exposure (the sum of the combined market exposures of its long and short futures and OTC derivatives positions) in excess of 100% of the net asset value of the Fund. While the use of leverage may increase the potential return on an investment in the Fund, it also increases the level of risk and may also result in substantial losses being incurred by the Fund.

The Fund has a gross maximum anticipated leverage, or maximum anticipated gross market exposure, of 19.5 times the net asset value of the Fund.

g. The content in the row entitled 'Derivatives' will be replaced with the following:

Derivatives	<p>The use of derivatives is key to the investment strategy of the Fund. The Fund invests in exchange-traded futures, over-the-counter foreign exchange forwards and over-the-counter interest rate swaps that provide returns linked to the movements in the underlying assets.</p> <p>The Fund may hold long and short exposures to the underlying assets through futures and OTC derivatives.</p> <p>All of the Fund's derivatives counterparties must, in IPM's reasonable opinion, meet specified credit criterion (in the case of executing brokers and prime brokers), and have sufficient expertise and experience in trading such financial instruments.</p> <p>You should note that there are risks associated with the use of derivatives including the requirement to post collateral.</p> <p> Refer to Section 3 of this PDS for more information on those risks.</p>
-------------	---

h. The content in the row entitled 'Short-selling' will be replaced with the following:

Short-selling	<p>The Fund may have short exposures to the underlying assets through futures and OTC derivatives although it does not engage in short-selling physical assets. In having exposure to short positions, the Fund bears the risk of an increase in price of the underlying investment over which the short position is taken.</p> <p>Such an increase could lead to a substantial loss being incurred by the Fund.</p> <p> Refer to Section 2 of this PDS for more information.</p> <p>You should note that there are specific risks associated with short-selling.</p> <p> Refer to Section 3 of this PDS for more information on those risks.</p>
---------------	---

2. The content in 'Investment manager' in Section 1.1 of the PDS will be replaced with the following:

IPM Informed Portfolio Management AB

Macquarie has appointed IPM Informed Portfolio Management AB (IPM, Investment Manager) to manage the Fund's derivatives exposure on a discretionary basis. See Section 1.2 of this PDS for more information.

3. The content in 'Cash manager' in Section 1.1 of the PDS will be replaced with the following:

Macquarie Investment Management Global Limited

Macquarie has appointed Macquarie Investment Management Global Limited (ABN 90 086 159 060 AFSL 237843) (**Cash Manager**) to manage the cash investments of the Fund in excess of margin requirements. The Cash Manager, a company incorporated under the laws of Australia, holds an Australian Financial Services Licence, authorising it to provide investment management services to the Fund. The Cash Manager will be paid a fee, which is paid by us out of our management fee for the Fund and is not an additional fee to you.

4. The second paragraph in 'Custodian' in Section 1.1 of the PDS will be replaced with the following:

Although Citi has been appointed as custodian, the futures and OTC derivatives contracts, and the majority of the Fund's cash, are generally held in the name of Macquarie in its capacity as the responsible entity of the Fund.

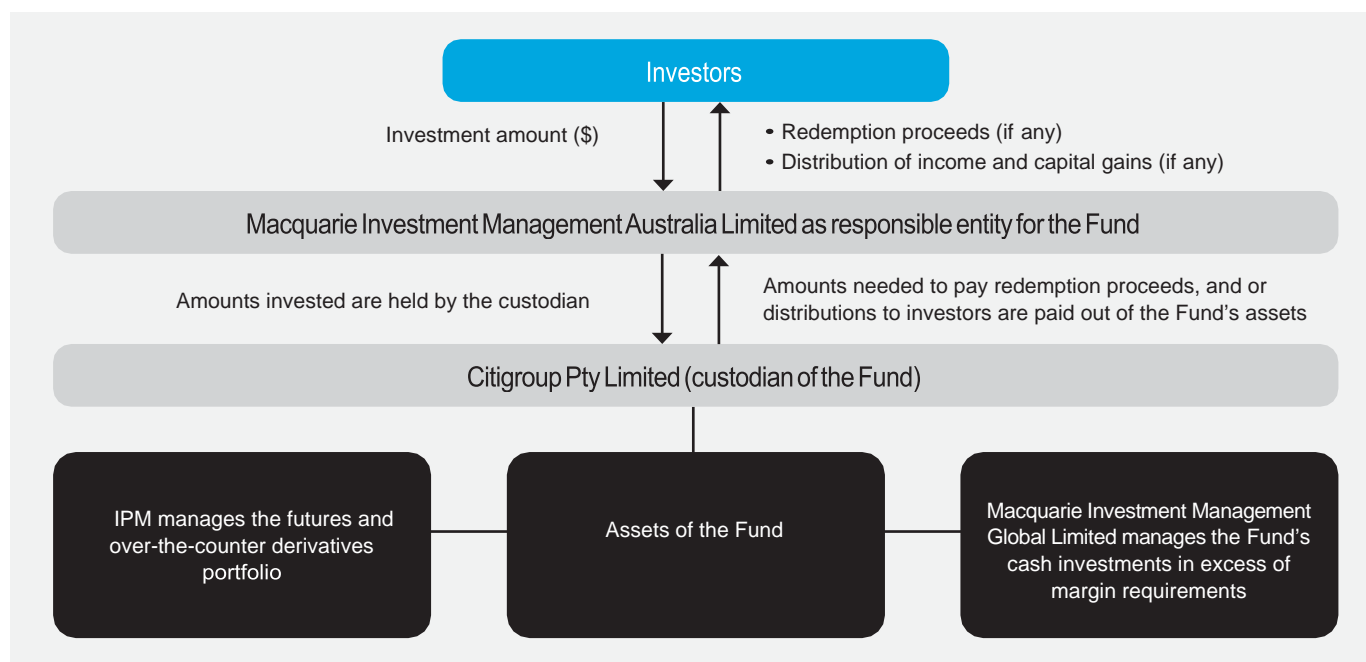

5. The heading and content in 'Futures clearing broker and OTC FX forwards prime broker' will be replaced with the following:

Morgan Stanley & Co. International plc

Macquarie has appointed Morgan Stanley & Co. International plc (**Morgan Stanley**) as futures clearing broker and the prime broker for the OTC foreign exchange derivatives held by the Fund. Morgan Stanley is a company incorporated under the laws of England and is authorised by the UK Prudential Regulation Authority (**PRA**) and regulated by the UK Financial Conduct Authority and the PRA. Morgan Stanley is also registered in Australia (ARBN 613 032 705) and is a foreign financial services provider relying on ASIC Corporations (Repeal and Transitional) Instrument 2016/396.

As futures clearing broker, Morgan Stanley will arrange for the futures contracts traded by the Fund to be cleared through, or traded on, futures exchanges. As prime broker, Morgan Stanley will accept OTC foreign exchange derivatives trades that the Fund has entered into with executing dealers, subject to certain conditions, and become the Fund's counterparty to those trades. We will pay Morgan Stanley commissions and fees for acting as the futures clearing broker and prime broker. These commissions and fees will be deducted from the assets of the Fund and will be reflected in the Fund's unit price.

6. The diagram in 'Additional disclosure for key service providers' will be replaced with the following:

7. The first paragraph in 'The Investment Manager' in Section 1.2 of the PDS will be replaced with the following:

Macquarie has appointed IPM to manage the Fund's derivatives exposure on a discretionary basis.

8. The first paragraph in 'Key individuals of the Investment Manager' in Section 1.3 of the PDS will be replaced with the following:

IPM's strategy is systematic and does not have any one person who has discretionary decision-making responsibilities. 'Systematic' in this context means that the vast majority of the portfolio exposures are based on the forecasts generated by IPM's systems, other than rare instances where IPM deems the circumstances to be exceptional. The following provides details of the identity, relevant qualifications and commercial experience of the key individuals of IPM. The individuals noted below are ultimately responsible for the oversight of IPM's investment activities for the Fund and will devote as much as time as IPM deems necessary or appropriate in order to manage the Fund's derivatives exposure.

9. The second paragraph in 'Valuation of Fund's assets' in Section 1.4 of the PDS will be replaced with the following:

The Fund's non-exchange traded assets are OTC derivatives, which are typically valued by Macquarie based on independent sources of data published by third party providers. Macquarie values the OTC derivatives itself because the valuations are based on independent sources of data and, given this and the risk controls described below, we do not believe that Macquarie performing the valuation results, in any material increase, in risk to investors.

10. The following changes will be made in Section 2.1 of the PDS:

a. The content in the row entitled 'Investment objective and strategy' will be replaced with the following:

Investment objective and strategy	<p>The Fund aims to generate long-term absolute returns by investing in exchange-traded and over-the-counter derivatives (OTC derivatives) that provide exposure to government bonds, commodities, equity indices, equity volatility indices, developed market and emerging market currencies, and interest rates. The Fund also holds cash and cash equivalents.</p> <p>The Fund may hold both long and short exposures to the underlying assets through futures, over-the-counter foreign exchange forwards, or over-the-counter interest rate swaps.</p> <p>IPM's investment process involves the use of models to determine the positions held by the Fund. The models are based on economic theory and rely on the belief that asset prices fluctuate around the true fundamental value of financial assets. The implementation of the investment process is systematic, which means that the vast majority of the Fund's portfolio exposures are based on the output of the model.</p> <p> Refer to Section 2.2 of this PDS for more information on the investment process.</p>
-----------------------------------	---

b. The content in the row entitled 'Futures and OTC FX forwards' will be deleted.

c. The first paragraph in the row entitled 'Currency denomination' will be replaced with the following:

The Fund is denominated in Australian dollars. The OTC derivatives positions of the Fund, and assets underlying these positions, can be denominated in any currency although they are generally not denominated in Australian dollars.

d. The content in the row entitled 'Derivatives' will be replaced with the following:

Derivatives	<p>The use of derivatives is key to the investment strategy of the Fund. The Fund invests in exchange-traded futures, over-the-counter foreign exchange forwards and over-the-counter interest rate swaps that provide returns linked to the movements in the underlying assets.</p> <p>The Fund may hold long and short exposures to the underlying assets through futures and OTC derivatives.</p> <p>All of the Fund's derivatives counterparties must, in IPM's reasonable opinion, meet specified credit criterion (in the case of executing brokers and prime brokers), and have sufficient expertise and experience in trading such financial instruments.</p> <p> Refer to Section 2.2 of this PDS for more information on the Fund's use of derivatives and Section 3 for information on the risks associated with the use of derivatives.</p>
-------------	--

e. The content in the row entitled 'Leverage' will be replaced with the following:

Leverage	<p>The Fund uses leverage, which is inherent in derivatives trading, to implement the investment strategy although it does not physically borrow to leverage.</p> <p>When you trade a futures and OTC derivatives contract, you do not pay, or receive, the full value of the contract at the time of trade. Instead, for each contract entered, the Fund pays an initial cash deposit (initial margin) that is dependent on the derivative traded. As a result, futures and OTC derivatives allow the holder to gain a much larger exposure to an asset class with a relatively small initial outlay. However, the use of leverage can lead to larger losses as well as larger gains.</p> <p>Margin is based on risk. In most circumstances, the higher the volatility of a market, the higher the margin rates. Typically, the total margin is made up of two components.</p> <ul style="list-style-type: none">• The initial margin is paid by the buyer and the seller of the contract. This is the minimum amount required to enter into a new contract.• The variation margin is an amount that is paid to cover an unfavourable move in positions. Each day, positions are revalued to market or settled. If a position has moved against the Fund since the previous day's close of trade, the Fund will be required to pay the difference as variation margin. If the position has moved in the Fund's favour, the Fund will receive that amount. <p>The gross market exposure of the Fund's combined long and short positions will often be greater than 100% of the net asset value of the Fund, and as a result, the Fund will often be leveraged. While the use of leverage may increase the potential return on an investment in the Fund, it also increases the level of risk and may also result in substantial losses.</p> <p>The Fund has a gross maximum anticipated leverage of 19.5 times the net asset value of the Fund.</p> <p>At the date of this PDS, the investment strategy that IPM is implementing for the Fund has historically averaged a leverage of approximately 8 to 10 times net asset value. There is no guarantee that historical levels of leverage will continue.</p> <p>IPM applies internal limits and guidelines to manage the derivatives exposure of the Fund. However, there are no 'hard' diversification limits (for example, on the gross exposure for each asset class or contract) imposed on IPM under the investment management agreement between Macquarie and</p>
----------	--

IPM. Refer to Section 2.2 of this PDS for more information how IPM applies risk management processes to manage the Fund's derivatives investments.

Example of the impact of the Fund's maximum anticipated level of leverage on investment returns and losses

The example below is provided for illustrative purposes only to show the impact that leverage may have on an investment. It does not represent any actual or prospective level of leverage and is not reflective of the expected return outcome of the Fund. The worked example excludes transaction costs and fees.

If the Fund employs the maximum anticipated level of gross leverage of 19.5 times, then for every \$1 of the Fund's net asset value, the Fund will have an \$19.50 exposure for every \$1 invested.

As a worked example, if the Fund were to utilise \$1,000,000 of its cash to purchase \$1,000,000 worth of investments and the Fund does not employ shorting, it is not using leverage. Its net asset value and gross market exposure is equal.

If the Fund were to employ the maximum level of anticipated leverage of 19.5 times through a combination of long and short positions, it would invest the original \$1,000,000 into derivatives contracts, which have leverage embedded within them, and obtain a gross market exposure of \$19,500,000.

If the Fund had positive performance and the total gross market exposure of the derivatives contracts increased by 5%, then the gross exposure would be \$20,475,000. The gain of \$975,000 represents a return of 97.5% on the \$1,000,000 invested in the Fund, resulting in a net asset value of \$1,975,000.

Conversely, if the Fund had negative performance and the total gross market exposure of the derivatives contracts decreased by 5%, then the gross market exposure would be \$18,525,000. This \$975,000 loss represents a 97.5% loss on the \$1,000,000 invested in the Fund, resulting in a net asset value of \$25,000.

You should note that there are risks associated with the use of leverage.

 Refer to Section 3 of this PDS for more information on those risks, and Section 2.2 for more information on the investment process and how IPM manages risks in the Fund.

Assets used as collateral

The initial margin and variation margin posted by the Fund is collateral to cover the risk of default on the futures and OTC derivatives it holds. If the Fund's margin account goes below a certain value, then a margin call is made and the Fund must replenish the margin account. Calls for margin are expected to be paid on the same day. If not, the party calling for margin may terminate the derivatives contracts. Cash deposited as margin may be encumbered or exposed to set off rights in certain circumstances. For example, the party holding the margin may have rights to take ownership of such collateral where an event of default occurs in relation to futures and OTC derivatives trading undertaken on behalf of the Fund. Also, the claims against the collateral by third parties may be accelerated in the event of insolvency of Macquarie in certain circumstances.

 Refer to Section 3 of this PDS for more information on the risks associated with the requirement to post collateral.

f. The content in the row entitled 'Short-selling' will be replaced with the following:

Short-selling

The Fund may have short exposures to the underlying assets through futures and OTC derivatives although it does not engage in short-selling physical assets. In having exposure to short positions, the Fund bears the risk of an increase in price of the underlying investment over which the short position is taken.

The key difference between a long position and a short position is that a short position involves an unlimited risk of an increase in the price of the assets underlying the short position. Such an increase could lead to substantial losses for the Fund.

 Refer to Section 2 of this PDS for details on how IPM manages the risks associated with the investment process generally (including short positions) and Section 3 for more information on the risks associated with short-selling.

g. The content in the row entitled ‘Asset allocation and investment guidelines’ will be replaced with the following:

Asset allocation and investment guidelines	<p>The Fund invests in exchange-traded derivatives (futures) and over-the-counter derivatives (OTC derivatives). The Fund also holds cash and cash equivalents.</p> <p>The Fund's investments may provide exposure to the following underlying assets:</p> <ul style="list-style-type: none"> • Australian listed equities • Australian government bonds • international listed equities • equity volatility indices • commodities • interest rates • international government bonds • developed market and emerging market currencies, and • cash and cash equivalents. <p>Investment limits and guidelines</p> <p>IPM applies internal limits and guidelines to manage the derivatives exposure of the Fund. However, there are no ‘hard’ diversification limits (for example, on the gross exposure for each asset class or contract) imposed on IPM under the investment management agreement between Macquarie and IPM. Refer to Section 2.2 of this PDS for more information on how IPM applies risk management processes to manage the Fund's derivatives investments.</p> <p>The Cash Manager manages the cash holding of the Fund in excess of the margin requirements for the Fund. The Fund's excess cash may only be held in bank accounts with Australian authorised deposit-taking institutions, or such other cash or cash equivalents as determined by the Cash Manager from time to time. The margin is held with Morgan Stanley, futures exchanges, clearing brokers, clearing houses or Citi.</p> <p>The Fund is monitored on an ongoing basis to ensure that it complies with these guidelines. The Fund will be rebalanced as soon as practicable should it move outside these guidelines. These guidelines may be changed from time to time.</p>
--	--

11. The content in ‘Investment process’ in Section 2.2 of the PDS will be replaced with the following:

IPM's investment process involves the use of models to determine the positions held by the Fund. The models are based on economic theory and rely on the belief that asset prices fluctuate around the true fundamental value of financial assets. The implementation of the investment process is systematic, which means that the vast majority of the Fund's portfolio exposures are based on the output of the model.

The process, in constructing a diversified portfolio, has its starting point in the evaluation of investment opportunities grouped under the following investment themes.

- Value – Identifies and takes positions against discrepancies between observed prices and longer term intrinsic value.
- Risk premia – Identifies opportunities for compensation for accepting risk resulting from investors having different risk preferences and the assumption that these preferences do not change over time.
- Macroeconomic – Identifies shifts in global economic activity and takes forward-looking positions to profit from the expected market adjustment.
- Market dynamics – Each market has its own set of specific characteristics which offer opportunities (for example, investment flows, volatility of interest rate curves).

Once individual investment opportunities have been evaluated, IPM aggregates all the investment ideas within each of the portfolios, which make up a broader portfolio, consisting of a relative value portfolio for each underlying asset class specified below and one directional portfolio.

- Relative value portfolios
 - These are segregated into different asset classes (developed market and emerging market currencies, interest rates, commodities, government bonds and equity indices).
 - Each underlying asset is evaluated against an equally- weighted basket of assets within that portfolio to establish long or short positions.
 - The aggregate of the long and short positions are expected to remain neutral; that is, the sum of net market exposures are targeted to be zero.
- Directional portfolio
 - This may include any of the following asset classes (developed market and emerging market currencies, commodities, government bonds, equity volatility indices and equity indices).
 - Unlike the relative value portfolios, this portfolio will take long or short positions across an asset class based on the model's prediction that that asset class (or certain features of that asset class) will rise or fall in value.

12. The content of 'Strategic risk allocation' in the sub-section entitled 'Risk management' in Section 2.2 of the PDS will be replaced with the following:

2. Strategic risk allocation

Part of the portfolio construction process is the strategic risk allocation between the Fund's relative value and directional portfolios. For this purpose, IPM applies a proprietary statistical risk optimisation process designed to avoid excessive risk allocation to portfolios that are, relatively speaking, more likely to exhibit larger losses (potentially simultaneously as one or more other portfolios). As such, the Fund targets a specific risk allocation expressed on a relative basis per portfolio.

13. The following risks in Section 3 of the PDS will be replaced with the following:

Investment risk: The risk of an investment in the Fund is significantly higher than an investment in a typical bank account or fixed income investment. While the Fund's benchmark is the RBA Cash Rate, the Fund is not a cash fund and is not expected to behave like a cash investment. Amounts distributed to unitholders may fluctuate, as may the Fund's unit price. Changes in the prices of positions to which the Fund has exposure may result in loss of principal or large movements in the unit price of the Fund within short or long periods of time, including during the period between a redemption request being made and the time the redemption unit price or application unit price is calculated. Different factors may affect the price of individual positions, particular asset classes (such as currencies, interest rates, commodities, government bonds and equity indices) or positions generally at different times. Due to market risk and the potential short-term volatility of the Fund, investors should have a medium to long-term investment horizon.

Leverage risk: Leverage arises in the Fund through taking both long and short positions which are larger in size than the net asset value of the Fund. The Fund will take leveraged positions with the aim of increasing returns which can also lead to increased losses. While this process forms a key part of the investment strategy, it may mean that gains and losses in the Fund may be significantly greater than those in funds that are not leveraged.

Market risk: Changes in the prices of positions that the Fund has exposure to may result in loss of principal or large movements in the unit price of the Fund within short or long periods of time. Global and local economic, financial, political, technological and environmental factors can drive changes in the prices of positions. It is not possible to predict the occurrence or magnitude of these and other potentially relevant factors. Different factors may affect the price of individual positions, particular asset classes (such as currencies, interest rates, commodities, government bonds and equity indices) or positions generally at different times.

Collateral risk: The Fund enters into derivatives arrangements that require it to deliver collateral to the derivatives counterparty. As such, the Fund will be exposed to the following additional risks.

- The Fund will need to have sufficient liquid assets to satisfy an obligation to post initial or variation margin/collateral. Failure to do so may give the counterparty a right to terminate.
- The Fund will be subject to the credit risk of the counterparty and if the counterparty becomes insolvent at a time it holds margin/collateral posted with it by the Fund, the Fund will be an unsecured creditor of the counterparty, and will rank behind other preferred creditors such as secured creditors and other creditors mandatorily preferred by law.

Short positions: The Fund may be exposed to short positions. In having exposure to short positions, the Fund bears the risk of an increase in the price of the investment over which the short position is taken. Such an increase could lead to a substantial loss for the Fund and ultimately, your investment. While losses on a long position are limited, losses on a short position are potentially unlimited as the price of the investment over which the short position is taken will generally have no theoretical upper limit. Such an increase could lead to a substantial loss.

Currency risk: Some of the investments to which the Fund has exposure to will be denominated in currencies other than Australian dollars. Therefore, the Fund is exposed to foreign exchange rate movements which may cause the value of these investments to decline significantly.

Concentration risk: Concentration risk is the risk that poor performance in a particular market may significantly affect the Fund. Although the Fund can have exposure to a diversified portfolio of equity indices, equity volatility indices, government bonds, commodities, interest rates and currencies, it may only be invested in a small number of markets. Generally, the fewer markets to which the Fund is exposed to, the greater the overall volatility of the Fund. This may result in large movements in the unit price of the Fund within a short period of time.

IMPORTANT INFORMATION

This document is a Product Disclosure Statement (**PDS**) which has been prepared by Macquarie Investment Management Australia Limited ABN 55 092 552 611 AFSL 238321 (**Macquarie, we, us, our**) as the responsible entity of the IPM Global Macro Fund (**Fund**).

Changes and updates to this PDS

The information in this PDS may change from time to time. Where the information in this PDS changes, and such change is not materially adverse to you, we may update the information by publishing an update at macquarie.com.au/pds.

Investments in the Fund are subject to investment risk

Other than Macquarie Bank Limited (**MBL**), none of the entities noted in this document are authorised deposit-taking institutions for the purposes of the Banking Act 1959 (Commonwealth of Australia). The obligations of these entities do not represent deposits or other liabilities of MBL. MBL does not guarantee or otherwise provide assurance in respect of the obligations of these entities, unless noted otherwise.

Business Days

A reference in this PDS to '**Business Day**' means a day (other than a Saturday, Sunday, public holiday or bank holiday) on which banks are open for general banking business in Sydney.

The offer

This offer is only open to persons receiving this PDS within Australia and New Zealand or any other jurisdiction approved by us. Unless otherwise stated all references to 'dollars' or '\$' herein refer to Australian dollars.

No offering to United States persons

Without limiting the above, the offer is only open to persons who are:

- not a 'U.S. person' for the purposes of Regulation S under the U.S. Securities Act of 1933, and
- a 'Non-United States person' as defined in Section 4.7(a)(1)(iv) of the rules of the U.S. Commodity Futures Trading Commission.

If you are not an eligible investor as defined above, we reserve the right to compulsorily redeem your unitholding in the Fund.

Warning statement for New Zealand investors

- The offer to New Zealand investors is a regulated offer made under Australian and New Zealand law. In Australia, this is Chapter 8 of the Corporations Act 2001 and Regulations. In New Zealand, this is Part 6 of Part 9 of the Financial Markets Conduct Act 2013 and Part 9 of the Financial Markets Conduct Regulations 2014.
- The offer and the content of the PDS is principally governed by Australian rather than New Zealand law. In the main, the Corporations Act 2001 and regulations made under that Act set out how the offer must be made.
- There are differences in how securities are regulated under Australian law. For example, the disclosure of fees for managed investment schemes is different under the Australian regime.
- The rights, remedies and compensation arrangements available to New Zealand investors in Australian financial products may differ from the rights, remedies and compensation arrangements for New Zealand financial products.
- Both the Australian and New Zealand securities regulators have enforcement responsibilities in relation to this offer. If you need to make a complaint about this offer, please contact the Financial Markets Authority, New Zealand (<http://www.fma.govt.nz>). The Australian and New Zealand regulators will work together to settle your complaint.
- The taxation treatment of Australian financial products is not the same as for New Zealand financial products.
- If you are uncertain about whether this investment is appropriate for you, you should seek the advice of an appropriately qualified financial adviser.
- The offer may involve a currency exchange risk. The currency for the financial products is not New Zealand dollars. The value of the financial products will go up or down according to changes in the exchange rate between that currency and New Zealand dollars. These changes may be significant.
- If you expect the financial products to pay any amounts in a currency that is not New Zealand dollars, you may incur significant fees in having the funds credited to a bank account in New Zealand in New Zealand dollars.*
- The dispute resolution process described in the PDS is only available in Australia and is not available in New Zealand.

* Redemptions and distributions of income will only be paid in Australian dollars to an Australian bank account.

IPM Global Macro Fund at a glance

The Fund is a 'hedge fund' for the purposes of Australian Securities and Investments Commission (**ASIC**) Regulatory Guide 240.

The following table sets out a summary of the disclosure ASIC requires for hedge funds, the key features of the Fund and a guide to where more detailed information can be found in this PDS. A copy of ASIC Regulatory Guide 240 dated October 2013 (as may be amended, supplemented or replaced from time to time) is available from www.asic.gov.au.

ASIC Regulatory Guide 240 – Benchmarks

Valuation of non-exchange traded assets	<p>This benchmark addresses whether valuations of the Fund's non-exchange traded assets are provided by an independent administrator or an independent valuation service provider. The Fund's non-exchange traded assets are over-the-counter foreign exchange forwards, which are typically valued by Macquarie based on independent sources of exchange rate data published by third party providers and therefore the benchmark is not met.</p> <p>Macquarie has expertise and experience in financial risk modelling and valuing financial products and other assets types, including non-exchange traded assets. Macquarie has in place valuation methods and policies which describe how non-exchange traded assets and liabilities are to be classified and the methodology to be used to value those assets and liabilities. These methods and policies are consistent with acceptable industry standards.</p> <p> Refer to Section 1.4 of this PDS for more information in relation to valuation of the Fund's assets.</p>
Periodic reporting	<p>This benchmark addresses whether the responsible entity of the Fund provides periodic disclosure of certain key information on an annual and monthly basis. This benchmark is not met as we do not provide investors with information on the maturity profile of the Fund's liabilities (that is, its liabilities under its derivatives positions). We do not provide this information because it is not relevant given the investment strategy of the Fund. In the ordinary course, we expect that the Fund's derivatives positions will be closed out before they reach maturity.</p> <p>The table in Section 7.2 of this PDS sets out the information that will be provided, how often it is available and where it can be accessed and also the information that will not be provided.</p> <p>For the purposes of ASIC Regulatory Guide 240:</p> <ul style="list-style-type: none"> Macquarie will provide the following information to investors on an annual basis: <ul style="list-style-type: none"> the Fund's liquidity profile, and the names of the derivatives counterparties engaged by the Fund. Macquarie will provide the following information to investors on a monthly basis: <ul style="list-style-type: none"> the Fund's gross exposures to each underlying asset class the Fund's current total net asset value the monthly and annual investment returns since inception of the Fund the redemption value of a unit in the Fund the net return on the Fund's assets after fees, costs and taxes any changes (including changes in related party status) to any of the Fund's key service providers the Fund's leverage ratio, and any material change in the Fund's risk profile or strategy, or change in the individuals playing a key role in making the Fund's investment decisions.

ASIC Regulatory Guide 240 – Disclosure Principles

Investment manager	<p>IPM Informed Portfolio Management AB has been appointed to manage the Fund's futures and over-the-counter foreign exchange forwards contracts exposure on a discretionary basis.</p> <p>Macquarie Investment Management Global Limited has been appointed to manage the cash investments in excess of the margin requirements of the Fund.</p> <p> Refer to Section 1 of this PDS for more information.</p>
Investment objective and strategy	<p>The Fund aims to generate long-term absolute returns by investing in exchange-traded government bond, equity index futures contracts and equity volatility index futures contracts, and over-the-counter foreign exchange forward contracts (OTC FX forwards) which provides exposure to developed market and emerging market currencies. The Fund may also gain exposure to developed market and emerging market currencies by investing in currency futures.</p> <p>The Fund holds both long and short positions in futures and OTC FX forwards. The Fund will also hold cash and cash equivalents.</p> <p>IPM's investment process involves the use of models to determine the positions held by the Fund. The models are based on economic theory and rely on the belief that asset prices fluctuate around the true fundamental value of financial assets. The implementation of the investment process is systematic, which means that the vast majority of the Fund's portfolio exposures are based on the output of the model.</p> <p> Refer to Section 2 of this PDS for more information on the investment strategy and process.</p>

ASIC Regulatory Guide 240 – Disclosure Principles

Fund structure	<p>The Fund is an Australian unit trust registered under the Corporations Act as a managed investment scheme. The responsible entity of the Fund is Macquarie Investment Management Australia Limited (Macquarie).</p> <p>We may appoint service providers to assist in the ongoing operation, management and administration of the Fund. The key service providers to the Fund are:</p> <ul style="list-style-type: none"> • IPM Informed Portfolio Management AB (IPM, Investment Manager), the investment manager of the Fund • Macquarie Investment Management Global Limited (Cash Manager), the cash manager of the Fund • Citigroup Pty Limited (Citi), the custodian of the assets of the Fund • Morgan Stanley & Co. International plc (Morgan Stanley), the futures clearing broker and OTC FX forwards prime broker for the Fund, and • Ernst & Young Australia, the auditor of the Fund. <p> Refer to Section 1 of this PDS for more information.</p>
Valuation, location and custody of assets	<p>Valuation of the Fund's assets</p> <p>The Fund's assets are normally valued at their most recent market value, using independent pricing sources where available for the particular asset type and in accordance with industry standards. Futures are generally valued by reference to the exchange settlement price and cash is valued at its face value with the addition of accrued interest. The Fund's non-exchange traded assets are OTC FX forwards, which are typically valued by Macquarie based on independent sources of exchange rate data published by third party providers (for example, the Reuters London 4pm Fixing).</p> <p> Refer to Section 1.4 of this PDS for more information.</p> <p>Location and custody of the Fund's material assets</p> <p>The Fund may invest in any futures markets globally. The futures, OTC FX forwards and underlying assets may be located in any jurisdiction worldwide and denominated in any currency. The Fund may invest in any developed market and emerging market currencies.</p> <p>The cash holdings of the Fund, in excess of margin requirements, will generally be denominated in Australian dollars and will be held in bank accounts with Australian authorised deposit-taking institutions, or such other cash or cash equivalent investments as determined by the Cash Manager from time to time. The margin for the Fund's futures and OTC FX forwards is held with Morgan Stanley, the futures exchange or Citi. The margin may be denominated in currencies other than Australian dollars.</p> <p>Citi has been appointed as the custodian of the Fund. However, the futures and OTC FX forwards contracts, and the majority of the Fund's cash, are held by Macquarie in its capacity as the responsible entity of the Fund.</p> <p> Refer to Section 2 of this PDS for more information.</p>
Liquidity of assets	<p>As at the date of this PDS, Macquarie reasonably expects to be able to realise at least 80% of the Fund's assets, at the value ascribed to those assets in calculating the Fund's net asset value, within ten days. You should note that there are risks associated with liquidity.</p> <p> Refer to Section 3 of this PDS for those risks.</p>

ASIC Regulatory Guide 240 – Disclosure Principles

Leverage	<p>The Fund uses leverage, which is inherent in futures and OTC FX forwards contracts, to implement the investment strategy although it does not physically borrow to leverage. Leverage generally provides a much larger exposure to the underlying assets with a relatively small initial outlay. The Fund, therefore, will often have a gross market exposure (the sum of the combined market exposures of its long and short futures and OTC FX forwards positions) in excess of 100% of the net asset value of the Fund. While the use of leverage may increase the potential return on an investment in the Fund, it also increases the level of risk and may also result in substantial losses being incurred by the Fund.</p> <p>The Fund has a gross maximum anticipated leverage, or maximum anticipated gross market exposure, of 18 times of the net asset value of the Fund and a maximum allowable leverage, or maximum allowable gross market exposure, of 18.5 times of the net asset value of the Fund.</p> <p>As at the date of this PDS, the investment strategy that IPM is implementing for the Fund has historically averaged a leverage of approximately 8 to 10 times the net asset value of the Fund. There is no guarantee that historical levels of leverage will continue.</p> <p> Refer to Section 2 of this PDS for more information.</p> <p>You should note that there are risks associated with the use of leverage.</p> <p> Refer to Section 3 of this PDS for more information on those risks.</p>
Derivatives	<p>The use of derivatives (in this case, futures and OTC FX forwards) is key to the investment strategy of the Fund. The Fund takes both long and short positions in exchange-traded futures and OTC FX forwards, which provide returns linked to the movements in the underlying assets.</p> <p>All of the Fund's derivatives counterparties must, in IPM's reasonable opinion, meet specified credit criterion, and have sufficient expertise and experience in trading such financial instruments.</p> <p>You should note that there are risks associated with the use of derivatives including the requirement to post collateral.</p> <p> Refer to Section 3 of this PDS for more information on those risks.</p>
Short-selling	<p>The Fund may hold short futures positions and OTC FX forwards although it does not engage in short-selling physical assets. In taking short positions, the Fund bears the risk of an increase in price of the underlying investment over which the short position is taken. Such an increase could lead to a substantial loss being incurred by the Fund.</p> <p> Refer to Section 2 of this PDS for more information.</p> <p>You should note that there are specific risks associated with short-selling.</p> <p> Refer to Section 3 of this PDS for more information on those risks.</p>
Redemptions	<p>You can generally redeem part or all of your investment in the Fund. Redemption requests will generally need to be received by us prior to 1.00pm Sydney time on a Business Day to receive the redemption price calculated for that Business Day (although we have discretion to reject or delay redemptions even if received by this time). Requests received after the cut-off time will generally receive the redemption price for the next Business Day. In some circumstances, investors may not be able to redeem their investment in the usual period or at all.</p> <p> Refer to Section 6.2 of this PDS for more information.</p>

Other key features of the Fund	
Inception date	10 April 2017
Suggested minimum investment timeframe	Five years
Who the Fund may be suitable for	<p>The Fund employs specialist trading and investment techniques that involve the use of short positions and derivatives. You should only consider investing in the Fund if:</p> <ul style="list-style-type: none"> • you have a high risk tolerance and a medium to long-term investment horizon • the amount you invest only makes up a small proportion of your broader portfolio of investments (that is, excluding your principal place of residence), and you will have additional funds at your disposal after you have invested in the Fund • you are advised by a financial adviser or have a high level of financial literacy and experience in investing in alternative investment strategies • you have carefully read all of this PDS • you understand and are comfortable with the risks associated with investing in the Fund • you have considered whether to seek, and if appropriate, you have sought, professional legal, taxation and financial advice to determine whether an investment in the Fund is appropriate for you, and • you have carefully considered the potential benefits and the risks involved in investing in the Fund, in light of your particular investment needs, objectives and financial and taxation circumstances. <p> Please refer to Section 3 of this PDS for a description of the significant risks of the Fund.</p>
Distribution frequency	Semi-annually (June and December)
Unit pricing frequency	Daily
Minimum transaction and balance requirements	
Direct investors	<p>Minimum initial investment: \$20,000¹</p> <p>Minimum balance: \$20,000¹</p> <p> Refer to Section 6 of this PDS for information on how to invest.</p>
Indirect investors	We suggest you contact your investor directed portfolio service (IDPS) operator for minimum transaction and balance requirements.
Fees and other costs	
Management fee	1.68% pa of the net asset value of the Fund (inclusive of the net impact of GST). The management fee accrues daily and is payable monthly. It is deducted from the Fund's assets and reflected in the Fund's unit price.
Performance fee	<p>20.5% (inclusive of the net impact of GST) of the cumulative outperformance of the Fund (after management fees and expenses but before the deduction of performance fees (paid or accrued)) above the return of the RBA Cash Rate, subject to a high watermark. The performance fee accrues daily and is payable quarterly in arrears. It is deducted from the Fund's assets and reflected in the Fund's unit price.</p> <p> Refer to Sections 4.1 and 4.2.2 of this PDS for more information and a worked dollar example.</p>
Buy/Sell spread	The buy/sell spread for the Fund, as at the date of the preparation of this PDS, is +0.03% for applications and -0.04% for redemptions, but these may be varied from time to time. In certain circumstances, the buy/sell spread may increase significantly. Notice will not usually be provided for variations to the buy/sell spread. The latest buy/sell spreads that may be applicable to an application or redemption from the Fund are posted on our website at macquarie.com.au/daily_spreads .

¹ Or as we determine otherwise.

1 How the Fund works

1.1 Fund structure

The Fund is an Australian unit trust registered under the Corporations Act 2001 (Cth) (**Corporations Act**) as a managed investment scheme. Each unit gives an investor in the Fund a beneficial interest in the Fund's assets as a whole, but not an entitlement to, or interest in, any particular asset of the Fund. Macquarie Investment Management Australia Limited (**Macquarie, we, us, our**), a company incorporated under the laws of Australia, is the responsible entity of the Fund and is responsible for operating the Fund in accordance with the Fund's constitution, and the Corporations Act. Other key entities involved in the Fund's investment structure are:

Investment manager

IPM Informed Portfolio Management AB

Macquarie has appointed IPM Informed Portfolio Management AB (**IPM, Investment Manager**) to manage the Fund's futures and over-the-counter foreign exchange forwards exposure on a discretionary basis. See Section 1.2 of this PDS for more information.

Cash manager

Macquarie Investment Management Global Limited

Macquarie has appointed Macquarie Investment Management Global Limited (ABN 90 086 159 060 AFSL 237843) (**Cash Manager**) to manage the cash investments in excess of the margin requirements of the futures exchanges, the futures clearing broker and the OTC FX forwards prime broker for the Fund. The Cash Manager, a company incorporated under the laws of Australia, holds an Australian Financial Services Licence, authorising it to provide investment management services to the Fund. We will pay the Cash Manager a fee for acting as the Fund's Cash Manager. The fee is not an additional fee to you and is paid by us out of our management fee for the Fund.

Custodian

Citigroup Pty Limited

Macquarie has appointed Citigroup Pty Limited (ABN 88 004 325 080, AFSL 238098) (**Citi**) as the custodian of the Fund. Citi is a company incorporated under the laws of Australia and is the holder of an Australian Financial Services Licence, authorising it to provide custodial services in Australia.

Although Citi has been appointed as custodian, the futures and OTC FX forwards contracts, and the majority of the Fund's cash, are generally held by Macquarie in its capacity as the responsible entity of the Fund.

Futures clearing broker and OTC FX forwards prime broker

Morgan Stanley & Co. International plc

Macquarie has appointed Morgan Stanley & Co. International plc (**Morgan Stanley**) as futures clearing broker and the prime broker for the OTC FX forwards held by the Fund. Morgan Stanley is a company incorporated under the laws of England and is authorised by the UK Prudential Regulation Authority (**PRA**) and regulated by the UK Financial Conduct Authority and the PRA. Morgan Stanley is also registered in Australia (ARBN 613 032 705) and is a foreign financial services provider relying on ASIC Corporations (Repeal and Transitional) Instrument 2016/396.

As futures clearing broker, Morgan Stanley will arrange for the futures contracts traded by the Fund to be cleared through, or traded on, futures exchanges. As prime broker, Morgan Stanley will accept OTC FX forwards trades that the Fund has entered into with executing dealers, subject to certain conditions, and become the Fund's counterparty to those trades. We will pay Morgan Stanley commissions and fees for acting as the futures clearing broker and prime broker. These commissions and fees will be deducted from the assets of the Fund and will be reflected in the Fund's unit price.

Other key service provider

In addition to the Investment Manager, the custodian and the futures clearing broker referred to above, the other key service provider to the Fund is Ernst & Young Australia, which provides the following services to the Fund:

- audits Macquarie's compliance with the Fund's compliance plan
- if required by the Corporations Act, reviews the Fund's half-yearly financial report and provides an auditor's report, and
- audits the Fund's financial report each financial year and provides an auditor's report.

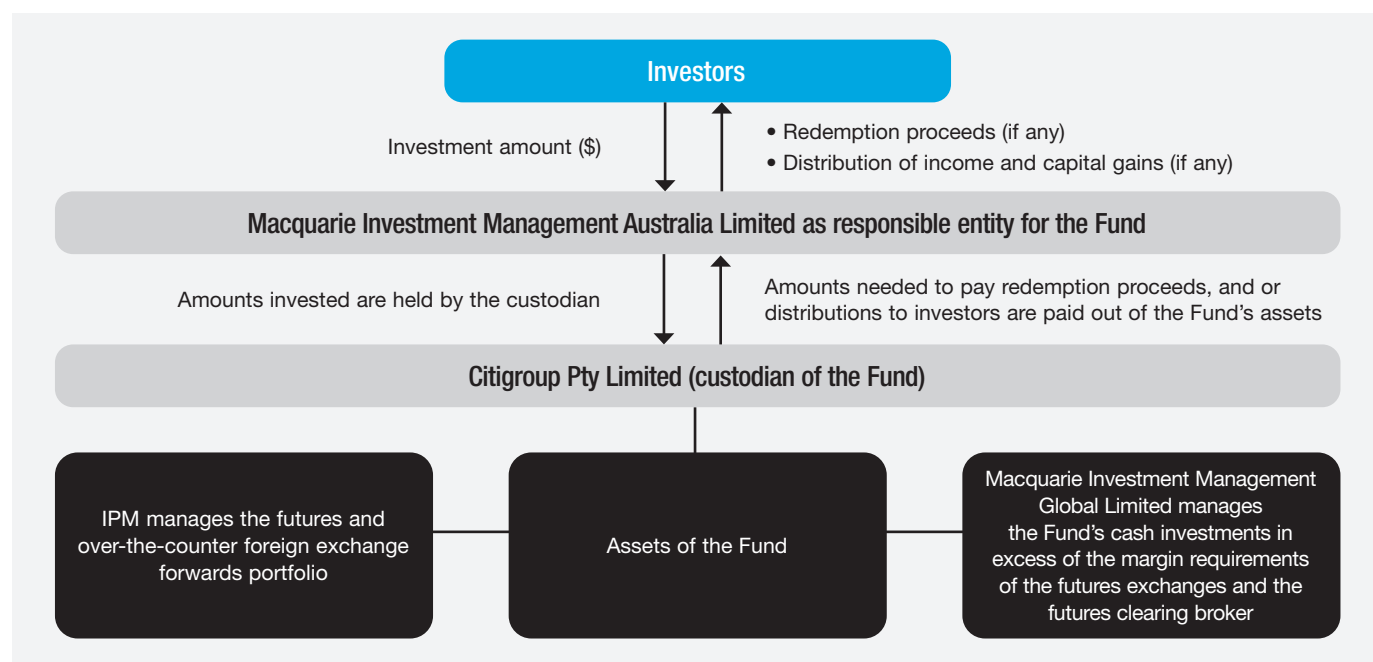

Additional disclosure for key service providers

Citi, Morgan Stanley and Ernst & Young Australia are paid service providers and are not responsible for the preparation of this PDS and therefore, accepts no responsibility for any information in this PDS.

The role of Citi, as the custodian of the Fund, is limited. The custodian acts on the instructions of Macquarie or its agents and does not monitor the performance of Macquarie as responsible entity of the Fund, or make investment decisions in respect of the Fund. Citi may appoint a sub-custodian to hold any of the assets of the Fund where Citi is unable to hold those assets directly, or it is otherwise more efficient to appoint a sub-custodian.

Macquarie and the Cash Manager, both part of Macquarie Group, are related corporations. Macquarie has entered into arm's length contractual agreements with each service provider and will periodically monitor and review their performance to ensure that services are being provided in accordance with the terms of such agreements.

The diagram below shows the flow of investment money through the structure of the Fund.

Material arrangements

Any material arrangements in connection with the Fund are on arm's length terms or better.

1.2 The Investment Manager

IPM Informed Portfolio Management AB

Macquarie has appointed IPM to manage the Fund's futures and OTC FX forwards exposure on a discretionary basis. IPM, founded in 1998 and based in Sweden, is a systematic investment manager offering macro and equity portfolio solutions to investors globally. IPM has been registered as a regulated investment firm with the Swedish Financial Supervisory Authority since 2002. IPM is also registered as a commodity trading adviser and commodity pool operator with the US Commodity Futures Trading Commission and is a member of the National Futures Association in such capacities.

The rights and obligations of each of Macquarie and IPM are set out in the terms of an investment management agreement which has been negotiated on an arm's length basis. There are no unusual or materially onerous terms (from an investor's perspective) in the investment management agreement. Under the investment management agreement between Macquarie and IPM, Macquarie may terminate the appointment of IPM as the investment manager of the Fund in the following circumstances:

- three months' written notice to IPM, and
- upon the occurrence of certain 'default' events including, but not limited to, a change of control of IPM, liquidation or insolvency of IPM, IPM ceasing to carry on business, a key person event or breach of a material provision or warranty, representation or undertaking of the agreement that has not been remedied within 10 business days of us asking IPM to do so.

On termination, IPM will generally be entitled to receive any accrued fees and expenses incurred in respect of the period to termination. Other than any accrued fees and expenses payable, there are no other payment obligations on termination of the investment management agreement by Macquarie.

1.3 Key individuals of the Investment Manager

IPM's strategy is systematic and does not have any one person who has discretionary decision-making responsibilities. 'Systematic' in this context means that the vast majority of the portfolio exposures are based on the forecasts generated by IPM's systems, other than rare instances where IPM deems the circumstances to be exceptional. The following provides details of the identity, relevant qualifications and commercial experience of the key individuals of IPM. The individuals noted below are ultimately responsible for the oversight of IPM's investment activities for the Fund and will devote as much as time as IPM deems necessary or appropriate in order to manage the Fund's futures and OTC FX forwards exposure.

Björn Österberg – Managing Director, Chief Investment Officer and Head of Research

Björn Österberg is responsible for the management and development of IPM's investment activities. He is a member of the executive, investment and risk management committees. Björn joined IPM in 2008, with extensive experience in managing quantitative research teams as well as in proprietary trading in a range of asset classes. Prior to IPM, he was Head of Quantitative Research and a member of the proprietary trading team at JP Bank, Head of Quantitative Research at Unibank/Nordea, and a Senior Equity Portfolio Manager at AP4. Björn holds a Masters of Science in Engineering Physics from the Royal Institute of Technology in Stockholm, and has several years of additional studies in both financial economics and macro economics from Stockholm University.

Mattias Jansson – Executive Director, Deputy Head of Research

Mattias Jansson joined IPM in 2005 and has been extensively involved in the research and development of IPM's strategies. His first years were spent at the research department where he worked closely with the advisory board on risk allocation issues and developing the novel approach still in place today in IPM's strategy. Mattias worked on the trading desk between 2007 and 2009, where he gained an in-depth practical understanding of financial markets. After which, he has been fully dedicated to research. Mattias holds a Masters of Science in Engineering Physics from the Royal Institute of Technology in Stockholm.

As at the date of this PDS, there have been no adverse regulatory findings against IPM or the key individuals responsible for the oversight of IPM's investment activities for the Fund.

1.4 Valuation and unit pricing

The price of a unit will generally be calculated each Business Day, and will be based on the value of the Fund's assets, less liabilities, divided by the number of units on issue (the **net asset value unit price**). The price of units will vary as the value of the Fund's assets and liabilities rises or falls. Application and redemption prices take into account our estimate of transaction costs (the **buy/sell spread**), and as a result, the application price will be higher than the net asset value unit price (by the amount of the buy spread), and the redemption price will be lower than the net asset value unit price (by the amount of the sell spread). See Section 4.2.5 of this PDS for further details on the buy/sell spread.

Under the constitution of the Fund, we have certain discretions in determining application and redemption prices. We have documented our policy regarding the exercise of these discretions. You can obtain a copy of the policy and the related documents by contacting Client Service.

In some circumstances, we may need to suspend the calculation of unit prices for the Fund (including indefinitely). For example, this may be necessary due to the closure of, or trading restrictions on, securities exchanges.

Valuation of Fund's assets

The Fund's assets are normally valued at their most recent market value, using independent pricing sources where available for the particular asset type and in accordance with industry standards. Futures are generally valued by reference to the exchange settlement price and cash is valued at its face value with the addition of accrued interest.

The Fund's non-exchange traded assets are OTC FX forwards, which are typically valued by Macquarie based on independent sources of exchange rate data published by third party providers (for example, the Reuters London 4pm Fixing). Macquarie values the OTC FX forwards itself because the valuations are based on independent sources of exchange rate data and, given this and the risk controls described below, we do not believe that Macquarie performing the valuation results, in any material increase, in risk to investors.

Macquarie has expertise and experience in financial risk modelling and valuing financial products and other assets types, including non-exchange traded assets. Macquarie has in place valuation methods and policies which describe how non-exchange traded assets and liabilities are to be classified and the methodology to be used to value those assets and liabilities. These methods and policies are consistent with acceptable industry standards.

How is the risk of any related party conflicts and any lack of independence in valuations addressed?

Macquarie has a number of controls in place which operate to limit the risk of any lack of independence and any related party conflicts in the valuation of non-exchange traded assets.

These include, but are not limited to:

- **best interests duty:** Macquarie, as responsibility entity of the Fund, is obliged under the Corporations Act to:
 - act in the best interests of members, and
 - in circumstances where there is a conflict between Macquarie's interests as responsible entity and the interests of members of the Fund, give priority to the members' interests,
- **separation of function/reporting line controls:** Macquarie employees performing the valuation function are separate from, and do not report to, personnel engaged in the management of the Fund's portfolio, and
- **documented policy regarding the exercise of valuation discretions:** Macquarie has documented its policy regarding the exercise of any discretions it may have under the Fund's constitution that relate to the determination of application and redemption prices. A copy of this policy is available free of charge from Client Service.

1.5 Distributions

The Fund may receive distributions, interest and gains from its underlying investments. We will generally seek to distribute any net income on a six-monthly basis and any net realised capital gains at least once a year. Distributions will be calculated based on the net income and net realised capital gains of the Fund. Unit prices may fall as a result of the allocation of distributions to unitholders.

You may elect to have your distributions paid directly into a nominated Australian financial institution account or to have them reinvested as additional units. If you do not make an election, your distributions will be reinvested.

If you elect to have your distributions paid to you, we may pay distributions into a non-interest bearing trust account in order to facilitate payment of these amounts to your nominated account. If we are unable to credit your account for any reason these amounts may continue to be held in such a non-interest bearing trust account until you provide alternative payment instructions or we are required by law to pay these amounts to any regulatory body or other person or account.

1.6 Calculating the performance of the Fund

To calculate the performance of the Fund, we comply with the standards set by the Financial Services Council. Performance figures are calculated before tax and after deducting fees and expenses, using net asset value prices, assuming that income is reinvested and that the investment is held for the full performance calculation period. Past performance figures can be obtained from our website at macquarie.com.au/performance or by calling Client Service. Past performance is not a reliable indicator of future performance, which can differ materially. Returns can be volatile, reflecting rises and falls in the value of the underlying investments.

2 How we invest your money

! You should consider the potential investment returns, the risks involved and your investment timeframe when deciding whether or not to invest in the Fund.

2.1 Investment objective and strategy

IPM Global Macro Fund

Investment objective and strategy

The Fund aims to generate long-term absolute returns by investing in exchange-traded government bond and equity index and equity volatility index futures contracts, and over-the-counter foreign exchange forward contracts (**OTC FX forwards**) that provide exposure to developed market and emerging market currencies. The Fund may also gain exposure to developed market and emerging market currencies by investing in currency futures.

IPM's investment process involves the use of models to determine the positions held by the Fund. The models are based on economic theory and rely on the belief that asset prices fluctuate around the true fundamental value of financial assets. The implementation of the investment process is systematic, which means that the vast majority of the Fund's portfolio exposures are based on the output of the model.

! Refer to Section 2.2 of this PDS for more information on the investment process.

Futures and OTC FX forwards

Futures and OTC FX forwards are contracts to buy or sell a particular asset on a specified future date at an agreed price. They provide returns linked to movements in particular underlying investments, which in this case are government bonds, equity indices, equity volatility indices, and developed market and emerging market currencies.

Futures traded on an exchange are standardised, interchangeable and generally liquid (that is, they are readily bought and sold) and valued in real time. OTC FX forwards are not traded on an exchange and, being 'over-the-counter' derivatives, are not standardised but instead can be tailored. However, like futures, OTC FX forwards are generally liquid as they can readily be closed out by either party. Both futures and OTC FX forwards are potentially an efficient way of accessing markets.

The Fund takes both long and short positions in futures and OTC FX forwards. A long position means the Fund has bought a futures and/or OTC FX forwards contract and will make a gain if the price of the contract (which reflects the price of the underlying asset) goes up. Conversely, the Fund will incur a loss if the price of the contract goes down. On the other hand when the Fund takes a short position, it will incur a loss if the price of the contract goes up and make a gain if the price goes down.

How does the Fund gain exposure to movements in equity volatility?

Volatility measures the frequency and magnitude of price movements, both up and down, that a financial instrument or index experiences over a certain period of time. The more frequent and significant the price swings in that instrument or index, the higher the level of volatility and vice versa. Volatility can be measured using actual historical price changes (realised volatility) or it can be an estimated measure of expected future volatility (implied volatility). Equity volatility indices measure the implied volatility of a particular equity market index (for example, the S&P 500 Index, which is an index comprised of 500 large companies listed on the NYSE or NASDAQ). An increase in the volatility index means that the volatility of the equity market index is expected to increase and a decrease in the volatility index means that the volatility of the equity market index is expected to decrease. The Fund gains exposure to the variability, or volatility, of equity markets by investing in equity volatility index futures. The Fund takes long or short positions in equity volatility index futures. A long position in equity volatility index futures means that the Fund will make a gain if the volatility index (and therefore, volatility on the relevant equity market) increases and a loss if the index (and therefore, volatility on the relevant equity market) falls. If the Fund takes a short position in equity market index futures, it will incur a loss if the volatility index increases and make a gain if the index falls.

Currency denomination

The Fund is denominated in Australian dollars. The futures and OTC FX forwards positions of the Fund, and assets underlying these positions, can be denominated in any currency. The futures and OTC FX forwards are generally not denominated in Australian dollars.

Cash and cash equivalents

All cash and cash equivalent investments of the Fund, excluding the cash held as margin, will generally be denominated in Australian dollars. The cash held as margin may be denominated in currencies other than Australian dollars.

Given that Fund assets will be denominated in foreign currencies, foreign exchange rate movements may increase or decrease the value of the Fund in Australian dollar terms. Some or all of this foreign currency exposure of the Fund may be hedged back to Australian dollars by IPM.

! Refer to Section 3 of this PDS for more information on the risks associated.

Liquidity of assets

As at the date of this PDS, Macquarie reasonably expects to be able to realise at least 80% of the Fund's assets, at the value ascribed to those assets in calculating the Fund's net asset value, within 10 days.

IPM Global Macro Fund

Derivatives	<p>The use of derivatives (in this case, futures and OTC FX forwards) is key to the investment strategy of the Fund. The Fund takes long and short positions in exchange-traded futures and OTC FX forwards, which provide returns linked to the movements in the underlying assets.</p> <p>All of the Fund's derivatives counterparties must, in IPM's reasonable opinion, meet specified credit criterion, and have sufficient expertise and experience in trading such financial instruments.</p> <p>! Refer to Section 2.2 of this PDS for more information on the Fund's use of derivatives and Section 3 for information on the risks associated with the use of derivatives.</p>
Leverage	<p>The Fund uses leverage, which is inherent in futures and OTC FX forwards trading, to implement the investment strategy although it does not physically borrow to leverage.</p> <p>When you trade a futures and/or OTC FX forwards contract, you do not pay, or receive, the full value of the contract at the time of trade. Instead, both the buyer and seller of a contract pay an initial cash deposit in order to enter into the contract. This initial deposit is called the margin. Futures and/or OTC FX forwards can get a much larger exposure to an asset class with a relatively small initial outlay. The use of leverage can lead to larger losses as well as larger gains.</p> <p>Futures margin rates are generally set by the futures exchanges, whereas margin rates for OTC FX forwards are generally set by the OTC FX forwards prime broker. Margin is based on risk. In most circumstances, the higher the volatility of a market, the higher the margin rates. The total margin is made up of two components.</p> <ul style="list-style-type: none"> • The initial margin is paid by the buyer and the seller of the contract. This is the minimum amount required to enter into a new contract. • The variation margin is an amount that is paid to cover an unfavourable move in positions. Each day, positions are revalued to market or settled. If a position has moved against the Fund since the previous day's close of trade, the Fund will be required to pay the difference as variation margin. If the position has moved in the Fund's favour, the Fund will receive that amount. <p>The gross market exposure of the Fund's combined long and short positions will often be greater than 100% of the net asset value of the Fund, and as a result, the Fund will often be leveraged. While the use of leverage may increase the potential return on an investment in the Fund, it also increases the level of risk and may also result in substantial losses.</p> <p>The Fund has a gross maximum anticipated leverage of 18 times of the net asset value of the Fund and maximum allowable leverage of 18.5 times of the net asset value of the Fund.</p> <p>At the date of this PDS, the investment strategy that IPM is implementing for the Fund has historically averaged a leverage of approximately 8 to 10 times of net asset value. There is no guarantee that historical levels of leverage will continue.</p> <p>IPM applies limits to manage the Fund's futures and OTC FX forwards investments. Refer to 'Asset allocation' below for the limits and guidelines.</p> <p>Example of impact of maximum anticipated level of leverage on investment returns and losses</p> <p>The example below is provided for illustrative purposes only to show the impact that leverage may have on an investment. It does not represent any actual or prospective level of leverage and is not reflective of the expected return outcome of the Fund. The worked example excludes transaction costs and fees.</p> <p>If the Fund employs the maximum anticipated level of gross leverage of 18 times, then for every \$1 of the Fund's net asset value, the Fund will have an \$18 exposure for every \$1 invested.</p> <p>As a worked example, if the Fund were to utilise \$1,000,000 of its cash to purchase \$1,000,000 worth of investments and the Fund does not employ shorting, it is not using leverage. Its net asset value and gross market exposure is equal.</p> <p>If the Fund were to employ the maximum level of anticipated leverage of 18 times through a combination of long and short positions, it would invest the original \$1,000,000 into derivatives contracts, which have leverage embedded within them, and obtain a gross market exposure of \$18,000,000.</p> <p>If the Fund had positive performance and the total gross market exposure of the derivatives contracts increased by 5%, then the gross exposure would be \$18,900,000. The gain of \$900,000 represents a return of 90% on the \$1,000,000 invested in the Fund, resulting in a net asset value of \$1,900,000.</p> <p>Conversely, if the Fund had negative performance and the total gross market exposure of the derivatives contracts decreased by 5%, then the gross market exposure would be \$17,100,000. This \$900,000 loss represents a 90% loss on the \$1,000,000 invested in the Fund, resulting in a net asset value of \$100,000.</p> <p>You should note that there are risks associated with the use of leverage.</p> <p>! Refer to Section 3 of this PDS for more information on those risks, and Section 2.2 for more information on the investment process and how IPM manages risks in the Fund.</p>

IPM Global Macro Fund

Leverage (continued)	Assets used as collateral <p>The initial margin and variation margin is collateral to cover the risk of default on the futures and/or OTC FX forwards contract. If the Fund's margin account goes below a certain value, then a margin call is made and the Fund must replenish the margin account. Calls for margin are expected to be paid on the same day. If not, the futures clearing broker, futures exchange or OTC FX forwards prime broker may terminate such futures and/or OTC FX forwards contracts. Cash deposited as margin with the futures clearing broker, futures exchange or OTC FX forwards prime broker may be encumbered or exposed to set off rights in certain circumstances. For example, these parties may have rights to such collateral where an event of default occurs in relation to futures and/or OTC FX forwards trading undertaken on behalf of the Fund. Also, the claims against the collateral by third parties may be accelerated in the event of insolvency of Macquarie in certain circumstances.</p> <p> Refer to Section 3 of this PDS for more information on the risks associated with the requirement to post collateral.</p>																								
Short-selling	<p>The Fund may hold short futures positions and short OTC FX forwards although it does not engage in short-selling physical assets. In taking short positions, the Fund bears the risk of an increase in price of the underlying asset over which the short position is taken. The key difference between a long position and a short position is that a short position involves an unlimited risk of an increase in the price of the securities underlying the short position. Such an increase could lead to substantial losses for the Fund.</p> <p> Refer to Section 2 of this PDS for details on how IPM manages the risks associated with the investment process generally (including short positions) and Section 3 for more information on the risks associated with short-selling.</p>																								
Asset allocation and investment guidelines	<p>The Fund invests in exchange-traded derivatives (futures) and over-the-counter derivatives (OTC FX forwards). The Fund also holds cash and cash equivalents.</p> <p>The Fund has indirect exposure, through derivatives contracts, to the following assets:</p> <ul style="list-style-type: none">• Australian listed equities• Australian government bonds• International listed equities• Equity volatility indices• International government bonds, and• Developed market and emerging market currencies. <p>Investment limits and guidelines</p> <p>The Fund has limits on its exposure to each underlying asset class as shown in the table below.¹</p> <table><tr><th></th><th>Maximum total gross exposure for each asset class (% of the Fund's net asset value)</th><th>Individual contract exposure limits within each asset class (% of the Fund's net asset value)</th><th>Global net (directional)² exposure limits for each asset class (% of the Fund's net asset value)</th></tr><tr><td>Developed market currencies</td><td>675</td><td>+/- 100</td><td>+/- 30</td></tr><tr><td>Emerging market currencies</td><td>125</td><td>+/- 25</td><td>+/- 30</td></tr><tr><td>Government bonds</td><td>1,700</td><td>+/- 300</td><td>+/- 515</td></tr><tr><td>Equity indices</td><td>225</td><td>+/- 25</td><td>+/- 50</td></tr><tr><td>Equity volatility indices</td><td>3.5</td><td>+/- 3.5</td><td>+/- 3.5</td></tr></table> <p>Cash and cash equivalent investments</p> <p>The Cash Manager manages the cash holding of the Fund in excess of the margin requirements for the Fund. The Fund's excess cash may only be held in bank accounts with Australian authorised deposit-taking institutions, or such other cash or cash equivalents as determined by the Cash Manager from time to time. The margin is held with Morgan Stanley, futures exchanges or Citi.</p> <p>The Fund is monitored on an ongoing basis to ensure that it complies with these guidelines. The Fund will be rebalanced as soon as practicable should it move outside these guidelines. These guidelines may be changed from time to time.</p>		Maximum total gross exposure for each asset class (% of the Fund's net asset value)	Individual contract exposure limits within each asset class (% of the Fund's net asset value)	Global net (directional)² exposure limits for each asset class (% of the Fund's net asset value)	Developed market currencies	675	+/- 100	+/- 30	Emerging market currencies	125	+/- 25	+/- 30	Government bonds	1,700	+/- 300	+/- 515	Equity indices	225	+/- 25	+/- 50	Equity volatility indices	3.5	+/- 3.5	+/- 3.5
	Maximum total gross exposure for each asset class (% of the Fund's net asset value)	Individual contract exposure limits within each asset class (% of the Fund's net asset value)	Global net (directional)² exposure limits for each asset class (% of the Fund's net asset value)																						
Developed market currencies	675	+/- 100	+/- 30																						
Emerging market currencies	125	+/- 25	+/- 30																						
Government bonds	1,700	+/- 300	+/- 515																						
Equity indices	225	+/- 25	+/- 50																						
Equity volatility indices	3.5	+/- 3.5	+/- 3.5																						

¹ Some or all of the Fund's foreign currency exposure may be hedged back to Australian dollars by IPM using instruments such as spot foreign exchange contracts and foreign exchange derivatives. Currency exposure obtained by the Fund as part of these hedging activities will not count towards the exposure limits in the table above.

² Refers to the directional portfolio held by the Fund as part of its broader portfolio of futures and OTC FX forwards. Refer to Section 2.2 of this PDS for a description of the directional portfolio.

2.2 Investment process

IPM's investment process involves the use of models to determine the positions held by the Fund. The models are based on economic theory and rely on the belief that asset prices fluctuate around the true fundamental value of financial assets. The implementation of the investment process is systematic, which means that the vast majority of the Fund's portfolio exposures are based on the output of the model.

The process, in constructing a diversified portfolio, has its starting point in the evaluation of investment opportunities grouped under the following investment themes.

- **Value** – Identifies and takes positions against discrepancies between observed prices and longer term intrinsic value.
- **Risk premia** – Identifies opportunities for compensation for accepting risk resulting from investors having different risk preferences and the assumption that these preferences do not change over time.
- **Macroeconomic** – Identifies shifts in global economic activity and takes forward-looking positions to profit from the expected market adjustment.
- **Market dynamics** – Each market has its own set of specific characteristics which offer opportunities (for example, investment flows, volatility of interest rate curves).

Once individual investment opportunities have been evaluated, IPM aggregates all the investment ideas within each of the five portfolios, which make up a broader portfolio, consisting of four relative value and one directional portfolios.

- **Relative value portfolios**
 - These are segregated into four asset classes (developed market and emerging market currencies, government bonds and equity indices).
 - Each underlying asset is evaluated against an equally-weighted basket of assets within that portfolio to establish long or short positions.
 - The aggregate of the long and short positions are expected to remain neutral; that is, the sum of net market exposures are targeted to be zero.
- **Directional portfolio**
 - This may include any of the four asset classes (developed market and emerging market currencies, government bonds, equity volatility indices and equity indices).
 - Unlike the relative value portfolios, this portfolio will take long or short positions across an asset class based on the model's prediction that asset class (or certain features of the asset class) will rise or fall in value.

Risk management

IPM assesses and manages risk management in three ways.

1. Embedded risk filters

Risk management is embedded into the investment process. As part of the process of aggregating all of the investment ideas described above, various groups of ideas in aggregation passes through a sequence of risk filters. The filters are intended to seek diversification to mitigate potential downside.

2. Strategic risk allocation

Part of the portfolio construction process is the strategic risk allocation between the five portfolios. For this purpose, IPM applies a proprietary statistical risk optimisation process designed to avoid excessive risk allocation to portfolios that are, relatively speaking, more likely to exhibit larger losses (potentially simultaneously as one or more other portfolios). As such, the Fund targets a specific risk allocation expressed on a relative basis per portfolio.

3. Risk on a trading level

Risk, on a trading level, is targeted at a predetermined annualised volatility; however, the volatility of the Fund should be expected to fluctuate depending on general market volatility and the perceived opportunity set. Volatility is measured using standard deviation.

2.3 Key assumptions and dependencies of the investment strategy

The ability of the investment strategy to produce investment returns will depend on a number of factors, including without limitation, the success of IPM's proprietary investment models ability to evaluate the relative attractiveness of each underlying asset based on fundamentals such as supply and demand, and the macroeconomic environment impact on the asset price, and exploiting the difference as seen in asset prices between the fundamental value and market value. The Fund is also likely to perform better when the market participants' are more focused on fundamental data as opposed to speculation around interventions from central banks and governments and in markets that have minimal intervention from central banks and governments. There is no guarantee that the Fund will achieve its performance objectives, or produce returns that are positive or compare favourably against its peers.

2.4 Ethical investments

IPM's investment process is based on economic theory and relies on the belief that market prices fluctuate around the true fundamental value of financial assets. The implementation of the investment process is systematic, which means that the vast majority of the portfolio exposures are based on the output of the model. Therefore, the Fund does not provide an opportunity for an investment style that takes into consideration labour standards, environmental, social or ethical considerations.

2.5 Changes to the Fund

We may make changes to the Fund from time to time, including to the investment strategy and guidelines of the Fund, or to investors' redemption rights. We may also terminate the Fund. We will provide such notice as required by the Corporations Act or constitution of the Fund and, if required by either the Corporations Act and/or the Fund's constitution, we will seek unitholder approval at a meeting of unitholders (see Section 7.1 of this PDS for more information).

If the Fund terminates, both the Fund and unitholders may crystallise taxable gains or losses (including capital gains or losses). You are encouraged to seek independent tax advice on the implications of investing in managed funds.

3 Risks you should consider

All investments carry risk. Different investments carry different levels of risk, depending on the investment strategy and the underlying investments. Generally, the higher the potential return of an investment, the greater the risk (including the potential for loss and unit price variability over the short term). Financial markets can and have been volatile, and higher levels of market volatility may result in greater risk for investors than an investment in less volatile markets. When you make an investment, you are accepting the risks of that investment. It is therefore important to understand these risks before deciding to invest.

The level of risk that you are willing to accept will depend on a range of factors including your financial objectives, risk tolerance, age, investment timeframe, where other parts of your wealth are invested and whether your investment portfolio will be appropriately diversified after making the investment. The value of your investment and the returns from your investment will vary over time. Future returns may differ from past returns. We do not guarantee the performance or returns of the Fund and you may lose some or all of the money that you invest in the Fund. The significant risks of the Fund are described below, but there could be other risks that adversely affect the Fund. You should seek your own professional advice on the appropriateness of this investment for your particular circumstances and financial objectives.

Strategy, model and research risk: The Investment Manager's strategy is implemented through a proprietary quantitative model that has a heavy emphasis on research. However, research is based on what has occurred in the past. To the extent a market deviates from its accustomed response to an event or the event itself is unusual, extreme or never before experienced by the market, the value of a research-based methodology will lessen. Mathematical models are representations of reality but they may be incomplete and/or flawed and there is an inherent risk that any forecasts derived from them may be inaccurate, particularly if the research or models are based on, or incorporate, inaccurate assumptions or data. Assumptions or data may be inaccurate from the outset or may become inaccurate as a result of many factors such as, changes in market structure or increased government intervention in markets. As a result, the Investment Manager's investment process may not generate profitable trading signals and the Fund may incur a loss.

Investment risk: The risk of an investment in the Fund is significantly higher than an investment in a typical bank account or fixed income investment. While the Fund's benchmark is the RBA Cash Rate, the Fund is not a cash fund and is not expected to behave like a cash investment. Amounts distributed to unitholders may fluctuate, as may the Fund's unit price. The unit price may vary by material amounts, even over short periods of time, including during the period between a redemption request or application for units being made and the time the redemption unit price or application unit price is calculated. Changes in the prices of futures and OTC FX forwards positions held by the Fund may result in loss of principal or large movements in the unit price of the Fund within short or long periods of time, including during

the period between a redemption request being made and the time the redemption unit price or application unit price is calculated. Different factors may affect the price of individual futures positions, particular asset classes (such as currencies) or futures positions generally at different times. Due to market risk and the potential short-term volatility of the Fund, investors should have a medium to long-term investment horizon.

Leverage risk: Leverage arises in the Fund through taking both long and short futures positions which are larger in size than the net asset value of the Fund. The Fund will take leveraged positions with the aim of increasing returns which can also lead to increased losses. While this process forms a key part of the investment strategy, it may mean that gains and losses in the Fund may be significantly greater than those in funds that are not leveraged.

Market risk: Changes in the prices of futures positions held by the Fund may result in loss of principal or large movements in the unit price of the Fund within short or long periods of time. Global and local economic, financial, political, technological and environmental factors can drive changes in the prices of futures positions. It is not possible to predict the occurrence or magnitude of these and other potentially relevant factors. Different factors may affect the price of individual futures positions, particular asset classes (such as shares, bonds, interest rates, currencies and commodities) or futures positions generally at different times.

Collateral risk: The Fund enters into derivatives arrangements that require it to deliver collateral to the futures exchanges or derivatives counterparty. As such, the Fund will be exposed to the following additional risks.

- The Fund will need to have sufficient liquid assets to satisfy an obligation to post initial or variation margin/collateral. Failure to do so may give the counterparty a right to terminate.
- The Fund will be subject to the credit risk of the counterparty and if the counterparty becomes insolvent at a time it holds margin/collateral posted with it by the Fund, the Fund will be an unsecured creditor of the counterparty, and will rank behind other preferred creditors such as secured creditors and other creditors mandatorily preferred by law.

Manager risk: There is no guarantee that the Fund will achieve its performance objectives, produce returns that are positive, or compare favourably against its peers. Many factors can negatively impact the Investment Manager's ability to generate returns from its investment process (for example, loss of key staff). The growth in assets managed in accordance with similar investment strategies may result in the Investment Manager and other market participants inadvertently buying and selling the same or similar investments simultaneously, which may reduce liquidity and exacerbate market movements. The Fund may then be subject to an increased risk of suffering substantial losses. In addition, the Investment Manager may change its investment strategies and internal trading guidelines over time, and there is no guarantee that such changes would produce favourable outcomes.

Short positions: The Fund may enter into short positions. In taking short positions, the Fund bears the risk of an increase in the price of the investment over which the short position is taken. Such an increase could lead to a substantial loss for the Fund and ultimately, your investment. While losses on a long position are limited, losses on a short position are potentially unlimited as the price of the investment over which the short position is taken will generally have no theoretical upper limit. Such an increase could lead to a substantial loss.

Currency risk: Some of the Fund's investments will be denominated in currencies other than Australian dollars. The Fund's investments are therefore exposed to foreign exchange rate movements and this may cause the value of the Fund's investments to decline significantly.

Active currency risk: The Fund also gains active exposure to currencies through active investment in derivatives. Such transactions and the active management of them involve a significant degree of risk and the markets in which foreign exchange transactions are effected are volatile, specialised and technical. Given the volatility in currency markets, there is no guarantee that active management will add to the value of your investment in the Fund. Significant changes, including changes in liquidity and prices, can also occur in such markets within very short periods of time, often within minutes. Foreign exchange trading risks include, but are not limited to, exchange rate risk, price gaps, interest rate risk and potential interference by foreign governments through intervention in local exchange markets, foreign investment or particular transactions in foreign currency. Adverse movements in exchange rates will result in the value of the Fund declining and this could happen over a short period of time.

Drawdown risk: The Fund may experience large cumulative losses, potentially over a short period of time, which may result in the unit price falling significantly below the price at which you invested, and therefore, result in a decline in the value of your investment in the Fund. This is referred to as a drawdown. There is no guarantee that the unit price will return to the level at which you invested. Performance fees are based on overall Fund performance and not the performance of any individual investment. You may therefore bear a share of a performance fee paid out of the Fund's assets even in circumstances where your investment in the Fund has fallen in value.

Derivatives risk: The Fund will invest in derivatives as part of its investment strategy. The use of derivatives may expose the Fund to risks including counterparty default, legal and documentation risk, and the risk of increased sensitivity of the Fund's unit price to underlying market variables. The use of derivatives may have the effect of magnifying both gains and losses.

Concentration risk: Concentration risk is the risk that poor performance in a particular market may significantly affect the Fund. Although the Fund can invest in a diversified portfolio of equity indices, equity volatility indices, government bonds and currencies, it may only be invested in a small number of markets. Generally, the fewer markets in which the Fund invests, the greater the overall volatility of the Fund. This may result in large movements in the unit price of the Fund within a short period of time.

Liquidity risk: Investments may be difficult or impossible to sell, either due to factors specific to that investment, or to prevailing market conditions. Liquidity risk may mean that an asset is unable to be sold or an exposure is unable to be rebalanced within a timely period and at a fair price, potentially resulting in loss, delays in redemption processing, or even the suspension of redemptions. If we are required to process a large redemption or application, the exposure of the Fund to particular investments, sectors or asset classes may be altered significantly, as determined by the Investment Manager. In addition, rapid liquidation of positions during adverse market conditions (for example, a market crash) is likely to lead to greater losses than would be the case under 'normal' market conditions.

Default risk: The Fund will be exposed to default risk of parties with whom it trades or invests or that provide services to the Fund where such parties fail to comply with their obligations (including payment obligations) or become insolvent. Such parties may include derivative counterparties, brokers (including clearing brokers and prime brokers), exchanges and clearing houses, the Investment Manager and custodian. Certain agreements may also seek to limit or exclude certain liability or types of loss including in circumstances where there has been a default by that party. The Fund may bear the risk of loss in the event of the default or insolvency of such parties. It is important to understand that these exclusions are sometimes greater for alternative investment strategies, such as the Fund's strategy, than they are for traditional investment strategies.

International and emerging market risk: The Fund may make investments that have exposure to a range of international economies, including emerging economies. Global and country specific macroeconomic factors may impact the Fund's international investments. Governments may intervene in markets, industries, and companies; may alter tax and legal regimes; and may act to prevent or limit the repatriation of foreign capital. Emerging markets in particular may experience lower liquidity, the potential for political unrest, the increased likelihood of sovereign intervention (including default and currency intervention), currency volatility, and increased legal risk. These events may impact the Fund's international investments.

Systems risk: The investment process of the Investment Manager is based on mathematical systems, which are implemented as automated computer algorithms and valuation systems. This also includes a risk management framework. In addition to the Investment Manager's proprietary software and code, the investment process is also reliant on third-party hardware and software. Issues with the design, development, implementation, maintenance or operation of the investment process; any component of the investment process; or any processes and procedures related to the investment process may cause losses to the Fund and such losses may be substantial.

Broad investment mandate: The Fund has a broad investment mandate. This gives the Investment Manager generally more discretion to allocate the Fund's investments, as compared with traditional investment managers who may have a narrower investment mandate. While the investment mandate has been designed with the aim of maximising the Fund's absolute returns, there is still the risk that investing to the full extent of the investment mandate may have an adverse effect on the value of the Fund.

Force majeure risk: Issuers or counterparties of investments that the Fund holds or has exposure to may be impacted by a force majeure event, which is an event beyond the control of that party. This includes events such as fire, flood, earthquakes, pandemic, war, terrorism and labour strikes. Such events may adversely affect that party's ability to perform its obligations resulting in an adverse impact on the Fund. A force majeure event may also impact the ability of Macquarie and/or the investment manager to operate and manage the Fund as described in this PDS.

Regulatory and legal risk: Governments or regulators may pass laws, create policy, or implement regulation that affects the Fund and/or the execution of investment strategies. Such initiatives may impact either a specific transaction type or market, and may be either country specific or global. Such changes may result in the Fund failing to achieve its investment objectives. Similarly laws affecting registered managed investment schemes (including taxation and corporate and regulatory laws) may change in the future, affecting investors' rights and investment returns.

Risks related to alternative investment strategies: The investment strategy for the Fund can be characterised as an 'alternative investment strategy'. Alternative investment strategies may be exposed to additional risks when compared to traditional investment strategies, such as long-only equity and fixed income strategies.

- They may display performance characteristics that are not normally associated with more traditional investment strategies.
- They may display more pronounced reactions to events such as macroeconomic shocks.
- They may be influenced by events that do not affect more traditional asset classes.
- They may fail to generate performance in a consistent manner.
- They may fail to recover at all, or to the same extent as traditional investment strategies, after periods of poor performance.
- They may cease to perform temporarily, or permanently, resulting in an inability to generate positive returns, or to recover prior losses.

Alternative investment strategies may also exhibit more correlation to traditional markets in the future than the strategy may have exhibited historically and therefore, may fail to provide the level of diversification to an investor's portfolio that was expected.

4 Fees and other costs

Did you know?

Small differences in both investment performance and fees and costs can have a substantial impact on your long-term returns. For example, total annual fees and costs of 2% of your account balance rather than 1% could reduce your final return by up to 20% over a 30-year period (for example, reduce it from \$100,000 to \$80,000).

You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs. You may be able to negotiate to pay lower contribution fees and management costs where applicable. Ask Macquarie Investment Management or your financial adviser.

To find out more

If you would like to find out more, or see the impact of the fees based on your own circumstances, the **Australian Securities and Investments Commission (ASIC)** website (www.moneysmart.gov.au) has a managed investment fee calculator to help you check out different fee options.

4.1 Fees and other costs

This table shows fees and other costs that you may be charged. These fees and costs may be deducted from your money, the returns on your investment or from the Fund's assets as a whole.

Unless stated otherwise, all fees are shown inclusive of GST, net of reduced input tax credits.

Information on how managed investment schemes are taxed is set out in Section 5 of this PDS.

You should read all of the information about fees and costs, because it is important to understand their impact on your investment.

Type of fee or cost ^{1,2}	Amount	How and when paid
Fees when your money moves in or out of the Fund		
Establishment fee The fee to open your investment	Nil	Not applicable
Contribution fee The fee on each amount contributed to your investment	Nil	Not applicable
Withdrawal fee The fee on each amount you take out of your investment	Nil	Not applicable
Exit fee The fee to close your investment	Nil	Not applicable
Management costs		
The fees and costs for managing your investment	<p>Management costs of 1.68% pa, comprising:</p> <p>Management fee 1.68% pa of the net asset value of the Fund.</p> <p>Indirect costs³ 0% pa of the net asset value of the Fund.</p>	<p>The management fee:</p> <ul style="list-style-type: none"> • accrues daily and is payable monthly, and • is deducted from the Fund's assets and reflected in the Fund's unit price. <p>Indirect costs are generally deducted from the Fund's assets and reflected in the Fund's unit price.</p> <p>Indirect costs are generally paid when incurred.</p>

¹ You may also incur a buy/sell spread when your money moves in or out of the Fund. Refer to Section 4.2.4 of this PDS for more information.

² Fees may be individually negotiated if you are a wholesale investor under the Corporations Act and subject to compliance with applicable regulatory requirements. See 'Differential fees' in Section 4.2.6 of this PDS for more information.

³ Based on our estimate of indirect costs incurred for the previous financial year. Actual costs may vary including by material amounts. Past costs may not be a reliable indicator of future costs. We do not currently seek reimbursement from the Fund for administrative expenses of the Fund. Abnormal expenses will generally be paid by the Fund. Indirect costs may also include certain costs such as over-the-counter derivatives and any other costs required to be included for the purposes of the Corporations Act. See 'Indirect costs' below for more information.

Type of fee or cost	Amount	How and when paid
Management costs (continued)	PLUS Performance fee 20.5% of the cumulative outperformance of the Fund (after management fees and expenses but before the deduction of performance fees (paid or accrued)) above the return of the RBA Cash Rate, subject to a high watermark.  Refer to Section 4.2.2 of this PDS for more information and a worked dollar example.	The performance fee: <ul style="list-style-type: none"> • accrues daily and is payable quarterly in arrears, and • is deducted from the Fund's assets and reflected in the Fund's unit price.
Service fees		
Switching fee The fee for changing funds	Nil	Not applicable

Additional fees and charges may apply. See 'Additional explanation of fees and costs' section below for further information.

Example of annual fees and costs of the Fund

This table gives an example of how the fees and costs in the Fund can affect your investment over a one-year period. You should use this table to compare the Fund with other managed investment products.

Example		Balance of \$50,000 with total contributions of \$5,000 during the year
Contribution fees	Nil	For every additional \$5,000 you put in, you will not be charged any contribution fee.
PLUS Management costs comprising:	1.68% pa¹	And for every \$50,000 you have in the Fund, you will be charged \$840 each year, comprising:
Management fee – Fund	1.68% pa	\$840
Performance fee – Fund	0.00% pa ²	\$0
EQUALS cost of Fund		If you had an investment of \$50,000 at the beginning of the year and you put in an additional \$5,000 during that year, you would be charged fees of \$840 . ³
		What it costs you will depend on the fees you may be able to negotiate.

- ¹ Calculated using the estimated 'indirect cost ratio' for the Fund for the previous financial year. The 'indirect cost ratio' refers to the management costs that were not paid directly out of your account (for example management fees and performance fees) but were paid from the Fund's assets over the relevant financial year, expressed as a percentage of the average net asset value of the Fund. Past performance is not a reliable indicator of future performance, and the amount of the management costs may be higher or lower in the future.
- ² The performance fee is an example only. It shows the estimated performance fee as a percentage of the Fund's total average net assets based on the performance of the Fund for the previous financial year. As at the date of this PDS, the Fund has an estimated performance fee for the current financial year of 0.59% per annum. It is not possible to accurately forecast the actual performance of the Fund or the performance fee payable in any given period. Accordingly, the actual performance of the Fund or performance fees charged by the Fund may differ to a material extent. Refer to Section 4.2.2 of this PDS for a description of the performance fee charged by the Fund. Past performance is not a reliable indicator of future performance.
- ³ This example assumes that there is no variation in the value of your investment and the additional investment of \$5,000 is made at the end of the period. In practice, the value of an investor's investment and the fees paid will vary and if an additional investment is made during the period, a management fee will also be payable on the additional investment from the date that the additional investment is made.

4.2 Additional explanation of fees and costs

4.2.1 Management fee

The fee is calculated as a percentage of the net asset value of the Fund, accrues daily and is payable monthly. It is deducted from the Fund's assets and reflected in the Fund's unit price. Macquarie will pay a portion of the management fee to the Investment Manager and the Cash Manager.

4.2.2 Performance fee

We also charge a performance fee of 20.5% of the cumulative outperformance of the Fund (after management fees and expenses but before the deduction of performance fees (paid or accrued)) above the return of the RBA Cash Rate, subject to a high watermark.

The performance fee, estimated at 0.59% per annum of the net asset value of the Fund, accrues daily and is payable quarterly. It is deducted from the Fund's assets and reflected in the Fund's unit price. Macquarie will pay the performance fee to the Investment Manager.

The estimated performance fee is based on information available as at the date of this PDS and assumptions that we consider to be reasonable. It is not possible to reliably provide the actual performance fee payable in any given period, as the performance of the Fund cannot be accurately forecast. The performance fee disclosed may differ to the actual performance fee charged, including to a material extent.

The example below is provided for illustrative purposes only and does not represent any actual or prospective performance of the Fund. We do not provide any assurance that the Fund will achieve the performance used in the example and you should not rely on this in determining whether to invest in the Fund.

In general terms:

1. Each day, the cumulative performance of the Fund, since the inception date, is compared with the cumulative performance of the Benchmark since the inception date of the Fund. The Fund's cumulative performance is calculated after the deduction of the management costs (paid or accrued) but before the deduction of performance fees (paid or accrued) and disregards any applications in and redemptions out of the Fund. The ratio of the Fund's performance above the performance of the Benchmark is referred to as 'outperformance'.
2. A 'high watermark' is set each time the level of cumulative outperformance exceeds the previous highest level of cumulative outperformance since inception of the Fund.
3. The ratio by which the Fund's cumulative outperformance exceeds the previous high watermark is then calculated.
4. If the previous high watermark is exceeded on a day, a performance fee of 20.5% of the ratio of outperformance above the previous high watermark, multiplied by the Fund's net asset value for that day (before the performance fee), is then accrued. The performance fee is calculated daily and payable quarterly.
5. However, if the previous high watermark is not exceeded, no performance fee is deducted, even if the Fund performance has exceeded the performance of the Benchmark on that day.

Example – Balance of \$50,000

On a day, the cumulative Fund performance since inception is compared with the cumulative performance of the Benchmark since inception, and there is no 'outperformance'.

No performance fee is payable.

On a day, the cumulative Fund performance since inception, when compared with the cumulative performance of the Benchmark since inception, has outperformed the Benchmark. However, the cumulative Fund outperformance since inception is less than the previous highest level of outperformance since inception of the Fund (the 'high watermark').

No performance fee is payable.

On a day, the cumulative Fund performance since inception, when compared with the cumulative Index performance since inception, has outperformed the Benchmark by 10%. The Fund's previous highest level of outperformance since inception of the Fund (the 'high watermark') is 8%.

$20.5\% \times [(1 + 10\%) / (1 + 8\%) - 1] \times \$50,000 = \$189.81$
Therefore, for a balance of \$50,000, you would effectively pay a performance fee of \$189.81 for that day.

4.2.3 Indirect costs

Indirect costs are the costs (excluding the management and performance fees referred to above) incurred in managing the Fund's assets which directly or indirectly reduce the return on the Fund. These costs are not directly charged or retained by us for acting as responsible entity of the Fund. These costs are generally deducted from the Fund's assets and reflected in the Fund's unit price. Indirect costs may comprise fund expenses, and other indirect costs, such as over-the-counter derivative costs and any other costs required to be included for the purposes of the Corporations Act.

Fund expenses – administrative and abnormal expenses

The constitution allows properly incurred expenses to be recovered directly from the Fund. When expenses are paid by the Fund, they will be deducted from the Fund's assets and reflected in the Fund's unit price. Expenses are generally paid when incurred.

We do not currently seek reimbursement from the Fund for administrative expenses such as custody fees, registry costs, audit, accounting and tax fees, postage and printing costs. Such expenses will be paid by us out of the management fee. We will provide prior notice to investors if we seek to recover these expenses in the future.

Abnormal expenses such as the cost of unitholder meetings, defending legal proceedings and the costs of terminating the Fund will generally be paid by the Fund. Abnormal expenses are not generally incurred during the day-to-day operation of the Fund and are in addition to administrative expenses.

Other indirect costs

Other indirect costs, if any, are generally paid when incurred.

4.2.4 Transactional and operational costs

Transactional and operational costs (such as brokerage, clearing costs, hedging costs, settlement costs, transaction fees, spreads, taxes and stamp duty incurred by the Fund) will generally be incurred as part of the management of the Fund. These costs are an additional cost to you and are reflected in the Fund's unit price. They are not amounts paid to us or the Investment Manager.

Buy/Sell spread

The Fund may recover an estimate of transactional and operational costs through a buy/sell spread from investors who apply for, or redeem units.

When units are acquired, a buy spread is added to the value of a unit. The buy spread is an amount which reflects the estimated

transaction costs associated with acquiring the underlying investments and may take into account the difference between the bid/offer price of investments traded and/or the estimated market impact of the acquisitions on the price of the investments being acquired. When units are redeemed, a sell spread is subtracted from the value of a unit. The sell spread is an amount which reflects the estimated transaction costs of disposing of the underlying investments and may take into account the difference between the bid/offer price of investments traded and/or the estimated market impact of the disposals on the price of the investments being sold. The buy/sell spreads are retained by the Fund and not paid to us or the Investment Manager.

A buy/sell spread seeks to ensure that the estimated transaction costs of the acquisition or redemption are borne by the investor who is applying for or redeeming the units, and not by the other investors in the Fund. The buy/sell spread may apply even if no transaction to acquire or dispose of assets is required (for example, where there is an application from one investor and a corresponding redemption by another investor).

The buy/sell spread for the Fund, as at the date of the preparation of this PDS, is +0.03% for applications and -0.04% for redemptions, but may be varied from time to time. In certain circumstances, the buy/sell spread may increase significantly. Notice will not usually be provided for variations to the buy/sell spread. The latest buy/sell spreads that may be applicable to an application or redemption from the Fund are posted on our website at macquarie.com.au/daily_spreads.

We may at our discretion reduce the buy/sell spread in certain circumstances, for example where an investor subscribes using assets (rather than cash) on an application or receives assets (rather than cash) on a redemption.

The buy/sell spread charged to investors offsets some or all of the transactional and operational costs incurred by the Fund which may include costs incurred as part of the ordinary trading activities of the Fund rather than the particular application or redemption. This is referred to as 'Fund buy/sell spread recovery'.

Estimated net transactional and operational costs

The estimated net transactional and operational costs for the Fund for the previous financial year were 0.47%, resulting from estimated transactional and operational costs of 0.57% less the estimated buy/sell spread recovery of 0.10%. For example, if you had an account balance of \$50,000 invested in the Fund over the year and there were no changes to your investment, you would have paid \$235 in net transactional and operational costs during that year (excluding any buy/sell spread as a result of applying for, or redeeming, units in the Fund). When added to the estimated management costs, you would have paid 2.15% (which amounts to \$1,075)¹ in costs.

The transactional and operational costs disclosed (including the buy/sell spread for the Fund) are based on information available as at the date of this PDS and assumptions that we consider reasonable, including assumptions about the bid/ask spreads and other costs of underlying assets. The transaction cost amounts are not forecasts of the total transaction costs in the future and the amount of transaction costs, including buy/sell spreads, may be higher or lower in the future.

4.2.5 Information about fee changes

We may change the amount of the fees without your consent (up to any maximum that is allowed under the Fund's constitution). If we increase the fees, we will provide you with at least 30 days written advance notice. We cannot charge more than the constitution of the Fund allows, unless we obtain approval to do so through a unitholder resolution. Under the constitution, the maximum fees (exclusive of the net effect of GST) are:

- a maximum contribution fee of 5% of the investment amount
- a maximum redemption fee of 5% of the redemption amount
- a maximum switching fee of 5% of the value of units subscribed for
- a maximum management fee of 5.5% of the value of the assets of the Fund, and
- a maximum performance fee rate of not more than 50% of the cumulative outperformance over an index based on the Benchmark, subject to a high watermark.

4.2.6 Other information about fees and costs

You may agree to pay your adviser a fee for any financial advice that they provide to you. This are separate to any fees we charge in respect of your investment in the Fund, as set out in Section 4.1 above.

Commissions and soft dollars

The dealer group to which an adviser belongs and your IDPS operators, may receive certain payments or other non-monetary benefits from us, such as business and technical support, professional development and entertainment.

We may, in accordance with applicable laws and Financial Services Council policy, receive goods and services (such as third party research) paid for by brokers where such goods and services assist us in managing the Funds.

The provision and receipt of such benefits is governed by our policy on soft dollar benefits. These payments and benefits are not an additional cost to you.

We also maintain a register of compliance with the Industry Code of Practice on Alternative Forms of Remuneration summarising alternative forms of remuneration that are paid by or provided to us. Contact Client Service to view this register.

Differential fees

We may negotiate with wholesale clients (as defined in the Corporations Act) differential management fees, rebates and other similar arrangements as permitted by the Corporations Act and ASIC relief. There is no set manner or method of negotiating fees. We may also offer reduced management fees to employees of the Macquarie Group of companies. The reduced fees are determined by us and notified to eligible employees from time to time. These arrangements do not adversely affect the fees paid or to be paid, or the returns of, other unitholders in the Fund who are not entitled to the benefit of the arrangements. Contact Client Service for more information.

Reduced management fees and performance fees may be in the form of rebates. At our discretion, the maximum rebate we will offer is 100%, for example where a Macquarie Investment Management fund invests into another Macquarie Investment Management fund, the management fee is generally fully rebated.

¹ This may differ materially in the current financial year. See the fee example table above for further details.

5 Taxation considerations

Investing in a registered managed investment scheme is likely to have tax consequences. The information contained in the following summary is intended to be of a general nature only. It does not constitute tax advice and should not be relied on as such. You are strongly advised to seek independent professional advice on the tax consequences of an investment in the Fund, based on your particular circumstances, before making an investment decision.

5.1 Tax position of the Fund

Income tax

The Fund will elect into the Attribution Managed Investment Trust (AMIT) regime where it is eligible to do so. Under the AMIT regime, investors will be attributed amounts of income on a fair and reasonable basis for each relevant financial year. Where the AMIT regime applies to the Fund, the Fund should not be liable for Australian income tax under present income tax legislation.

The AMIT regime is designed specifically for managed funds to provide certainty and flexibility to managed funds and their investors. The AMIT regime also seeks to codify longstanding managed fund industry practice.

Under the AMIT rules:

- The Fund will be deemed to be a 'fixed trust' for taxation law purposes.
- The allocation of taxable income to investors is based on 'attribution' rather than present entitlement to the 'income' of the Fund.
- The Fund may make year-on-year adjustments to reflect under-or-over distributions of the Fund's income ('under and overs').
- Investors may increase or decrease the cost base of their units where taxable income attributed is either less than or greater than (respectively) broadly the cash distribution and tax offsets for an income year, to avoid the potential for double taxation.

While investors will be attributed income under the AMIT regime, this should not fundamentally change the way investors are taxed. Consistent with the previous trust taxation regime:

- Australian residents will include their share of the Fund's income in their income tax return, and
- non-residents will have withholding tax deducted from distributions they receive from the Fund.

If the Fund does not elect into the AMIT regime, investors in the Fund will be presently entitled to the entire amount of

the income of the Fund (including any capital gains) for each relevant financial year and will be assessed for tax on their share of the net income of the Fund (including any capital gains) for a financial year. If the Fund incurs a tax loss in a financial year, there will be no distributable income for that year and the tax loss may be carried forward to be utilised in subsequent financial years (subject to the loss carry forward rules).

Please contact Client Service if you would like confirmation if the Fund has elected into the AMIT regime.

5.2 Tax position of resident investors

The following comments only deal with Australian residents who are individuals, complying superannuation entities and companies that will hold their units on capital account.

Capital Gains Tax (CGT)

An Australian resident investor's assessable income for each year includes any net capital gains (that is, after offsetting capital losses).

There are two potential sources of capital gains tax to investors in relation to their investment in the Fund:

1. Capital gains tax may be payable on part of the distribution made in respect of units from the Fund that relates to the disposal of CGT assets in the Fund. The Fund has made the Managed Investment Trust CGT election to treat shares, units and options over shares and units as CGT assets. The Fund's ability to make this election is subject to it satisfying certain criteria.

The Fund does not make allowance in the unit price for any tax on unrealised net gains accruing when investments are re-valued. As a result, investors should be aware that they may be liable for capital gains tax arising from the sale of assets where unrealised gains arose before they acquired their units.

The distribution by the Fund of certain non-taxable amounts (if any) may give rise to cost base adjustments to an investor's units for CGT purposes. Such cost base adjustments may result in either an increased capital gain or reduced capital loss on the subsequent disposal of units in the Fund, or, an immediate capital gain to the extent the cost base of the units of the Fund is reduced to less than zero.

2. Capital gains tax may be payable when units are redeemed from the Fund. Concessions may be available depending on how long the units have been held. Where the units have been held continuously for at least 12 months, individuals and trusts may be entitled to a CGT discount of 50% and superannuation entities may be entitled to a discount of 33 1/3% in relation to the disposal of units. Companies are not entitled to this discount. Capital losses incurred by an investor may be offset against the gross capital gains for the investment before the application of the CGT discount.

Where the Fund is an AMIT, the capital gains or income arising from securities sold to meet a significant redemption can be distributed to the redeeming investor on a fair and reasonable basis. Significant redemptions will generally be those where an investor's total redemptions in the one financial year are 5% or more of the Fund's net asset value but may be lower where we believe it is fair and reasonable in the circumstances. The objective would be for remaining investors not to be materially adversely affected by the capital gains resulting from a disposal of the assets where both the Fund and the redeeming investors make a capital gain in the relevant financial year.

Where the AMIT regime does not apply to the Fund and the constitution of the Fund permits, capital gains or income arising from securities sold to meet a significant redemption may also be distributed to the redeeming investor to ensure that remaining investors are not materially adversely affected by the redemption. Where the Fund is not an AMIT, significant redemptions are subject to the 5% of net asset value threshold.

Taxation of financial arrangements (TOFA)

The TOFA rules may apply to financial arrangements held by the Fund when calculating its assessable income. Broadly, the TOFA rules may impact the timing of the recognition of gains and losses in the Fund for tax purposes and will also treat relevant gains and losses as being on revenue account.

Foreign income tax offsets

Australian residents are required to include in their assessable income their share of certain foreign taxes paid in respect of income derived by the Fund. Investors may be able to benefit from a foreign income tax offset in respect of foreign taxes paid by the Fund provided they are paid in relation to an amount that is included in the investor's assessable income and do not exceed the higher of a particular investor's foreign income tax offset limit and \$1,000.

Tax file number (TFN) and Australian Business Number (ABN)

It is not compulsory for investors to provide their TFN or ABN, and it is not an offence if they decline to provide them. However, unless exempted, if the TFN or ABN is not provided, tax will be deducted from income at the highest marginal rate plus the Medicare levy. TFNs and ABNs can be provided on the application form when making an initial investment.

Goods and Services Tax (GST)

The Fund has registered for GST. The issue and redemption of units in the Fund and receipt of distributions will not be subject to GST. However, the Fund may incur GST on fees and expenses that it pays. The Fund may be entitled to claim input tax credits and/or reduced input tax credits on certain of these fees and expenses.

5.3 Tax position of non-resident investors

Non-resident withholding tax

Appropriate deductions of Australian tax will be made from distributions of Australian sourced income to non-resident investors. The amounts will be withheld at the rates of tax applicable to non-resident investors and will depend on the type of income and residence of the investor. Distributions to non-resident investors from sources wholly outside of Australia and on most capital gains will generally be exempt from Australian income tax and withholding tax. Non-resident investors may also be subject to tax laws in the country in which they reside, but may be entitled to a credit for some or all of the tax deducted in Australia.

Capital Gains Tax

On the basis that the assets of the Fund will not be direct or indirect interests in Australian real property, no capital gains tax consequences should arise for non-resident investors (assuming that their units are held on capital account) as a result of investing in the Fund.

5.4 General information

Transaction taxes

Normal transaction taxes and stamp duties (if any) also apply.

Tax statement

An annual tax statement will be sent to each Australian resident investor to assist in completing tax returns.

Tax advice

If you have any questions regarding the application of income tax or capital gains tax to an investment in the Fund, you should consult your tax adviser. Investors should seek their own professional advice, including as to taxation, before

investing. Please note that any discussion of tax in this PDS refers to Australian tax law as at the date of this PDS, and that these laws may change at any time.

Automatic Exchange of Financial Account Information

Foreign Account Tax Compliance Act and Common Reporting Standard

Australian legislation relating to the automatic exchange of financial account information between jurisdictions has been passed. This legislation gives effect to the United States of America Foreign Account Tax Compliance Act (**FATCA**) and the OECD Common Reporting Standard for Automatic Exchange of Financial Account Information (**CRS**). These regimes cover the collection and reporting of information to tax authorities by financial institutions.

The Fund is a reporting Australian financial institution under the inter-governmental agreement entered into between the Australian and US governments in relation to FATCA effective from 1 July 2014. The Fund is also a reporting Australian financial institution under the CRS, effective from 1 July 2017. As such, the Fund will be required to comply with the registration, due diligence and reporting requirements of FATCA and CRS.

Accordingly, we may request that you provide certain information in order for the Fund to comply with their FATCA or CRS obligations. Depending on your status, for the purposes of FATCA and CRS, we may assess any information you provide to us and if required, report information in relation to you and your unit holding to the Australian Taxation Office (**ATO**). The ATO will, in turn, share such information with the US Internal Revenue Service or tax authorities of jurisdictions that have signed the 'CRS Competent Authority Agreement' on an annual basis.

How could the FATCA and CRS regulations affect you?

By applying for units in the Fund, you:

- agree to promptly provide us or our service providers with any information we may request from you from time to time
- agree to promptly notify us of any change to the information you have previously provided to us or our service providers
- consent to us disclosing any information we have in compliance with our obligations under FATCA and CRS
- consent to us disclosing any information we have if your units are held by or for the benefit of, or controlled indirectly by, specified US person(s) (in the context of FATCA) or foreign tax resident(s) (in the context of CRS), including disclosing information to the ATO, which may in turn report that information to the US Internal Revenue Service or other foreign tax authority, and
- waive any provision of domestic or foreign law that would, absent a waiver, prevent us from complying with our obligations under FATCA and CRS.

Failure to comply with our obligations under FATCA and CRS could result in the Fund being subject to a 30% US withholding tax on payments of US income or gross proceeds from the sale of particular US securities (in relation to FATCA only) and administrative penalties under Australian taxation law.

It is important to note that:

- although the Fund may take steps to manage the imposition of any withholding tax or penalties, no assurance can be given that the Fund will be successful, and
- if you fail to provide us with any information requested by us, and we become subject to such withholding tax or penalties, we may seek to recover such amount from you.

For further information in relation to how our due diligence and reporting obligations under FATCA and CRS may affect you, please consult your tax adviser.

6.1 Making initial and additional investments in the Fund

Application cut-off time (Application Cut-off) ¹	Minimum initial investment amount ¹
1.00pm Sydney time on a Business Day	\$20,000

¹ Or as we otherwise determine.

You can apply to make an initial investment in the Fund by completing the application form accompanying this PDS (**Application**). Unless we agree otherwise, where we receive an Application (including any required identification documentation) completed to our satisfaction, and cleared funds before the Application Cut-off, investors will generally receive the application price calculated for the relevant Business Day.

Unless we agree otherwise, if we receive an Application (including any required identification documentation) completed to our satisfaction, and cleared funds after the Application Cut-off, or on a non-Business Day, we will generally treat the Application as having been received before the Application Cut-off for the next Business Day. Generally, Applications made by direct debit may take up to four Business Days before the amount is invested but may take longer in certain circumstances.

If we are not able to issue units immediately after receipt of your application money, that money will be held in a non-interest bearing trust account with an authorised deposit-taking institution. If we are not able to issue units within a period of one month starting from the day on which we receive your application money (or if this is not reasonably practicable, by the end of such longer period as is reasonable in the circumstances), we will return the application money to you.

You can add to your investment at any time by depositing cleared funds using the account details provided to you at the time of your initial investment (**Investment Account**). Deposits into the Investment Account will be deemed to be an application for additional units in the Fund and will be subject to the same Application Cut-off requirements that apply to initial investments. We will not be responsible for any losses incurred by you as a result of the incorrect payment of funds into the Investment Account or into another incorrect bank account. We may accept or reject an application (in whole or in part) at our discretion (without giving reasons).

How to apply

To make your initial investment, complete the Application Form that is contained in this PDS. You can send the completed Application Form and required identification documentation to us by mail, facsimile or email. If you fax or email your identification documentation to us, we may request certified copies of the originals to follow in the mail for our records and your account may not be opened until they have been received.

If you are an indirect investor investing through an investor directed portfolio service (**IDPS**), please contact your financial adviser or IDPS operator for details of how to invest in the Fund.

Paying your investment amount

Payment of the initial and any additional investment amounts can be made by:

- bank transfer
- Real Time Gross Settlement (**RTGS**)
- cheque
- direct debit (for initial investment amount only), and
- such other method approved by us.

Make the cheque payable to 'MIMAL – IPM Global Macro Fund A/C [Full investor name]'.

For example 'MIMAL – IPM Global Macro Fund A/C John Smith ATF Smith Super Fund'.

To assist in processing additional investments greater than \$500,000, please send notification by facsimile or email to Client Service prior to the Fund's Application Cut-off. There may be delays in receipt of cleared funds for each method of payment and cleared funds will not necessarily be received by Macquarie prior to any particular cut-off requirement. Payments must be made in Australian dollars.

Delays when an Application Form is incomplete

As part of Macquarie's obligations under the Anti-Money Laundering and Counter-Terrorism Financing Act 2006 (Cth) (**AML/CTF**), we cannot accept or process an application to invest until we are satisfied that the identity of the investor has been verified in accordance with the AML/CTF.

Where an application is unable to be finalised for AML/CTF reasons or is otherwise incomplete, we will seek to contact you to obtain the missing or additional information. Your application will not be accepted by us, nor units issued to you, unless our AML/CTF verification has been completed or other issues have been addressed to our satisfaction.

We will not be liable to any prospective investor for any losses incurred, including as a result of market movements, if an application is rejected or the processing of an application is delayed.

6.2 Redeeming your investment

Redemption cut-off time (Redemption Cut-off) ¹	Minimum balance amount ^{1,2}
1.00pm Sydney time on a Business Day	\$20,000

¹ Or as we otherwise determine.

² If acceptance of a redemption request will result in a balance less than the minimum balance amount, we may either reject the redemption request or treat the redemption request as relating to your entire holding.

You can generally request redemption of all or part of your investment in the Fund by completing a redemption request form which you can download at macquarie.com/redemptionform. Alternatively, you can provide a signed request specifying the account name, the Fund name, the amount or number of units to be withdrawn and bank details. You can send your redemption request by facsimile, email, mail or such other method agreed by us.

Where we receive a redemption request, completed to our satisfaction, before the Redemption Cut-off, investors will generally receive the redemption price calculated for that Business Day. Unless we agree otherwise, if we receive a redemption request, completed to our satisfaction, after the Redemption Cut-off, we will generally treat the request as having been received before the Redemption Cut-off for the next Business Day.

Before paying you the redemption amount, we may deduct from that amount any money you owe us in relation to your investment. Redemption proceeds will generally be paid within five Business Days after we accept the redemption request.

Suspension of redemptions

In some circumstances, such as where there is a suspension of redemptions, investors may not be able to redeem their investment within the usual period or at all. It is also important to note that under the terms of the constitution, we:

- may accept or reject a redemption request (in whole or in part) at our discretion (without giving reasons), and
- are able to change the time by which a redemption request must be lodged and/or the days on which redemptions will be available at our discretion.

Where a redemption request is accepted by us, the Fund's constitution generally allows us up to 21 days after acceptance of the request to pay the redemption proceeds. This may be extended if:

- payment of all or part of the redemption amount is not in the interests of unitholders as a whole, is materially adverse to unitholders as a whole or is not fair to the remaining unitholders, or
- market conditions are such that liquidation of the Fund's assets to facilitate the redemption is difficult, not desirable or impossible (such as where there is restricted liquidity or suspended trading in a market for the assets of the Fund).

Potential investors should refer to the constitution of the Fund for full details of when Macquarie may delay the redemption of units and/or the payment of redemption proceeds.

We may be required to suspend redemptions from the Fund (including indefinitely) where the Fund is no longer 'liquid', as defined in the Corporations Act. While the Fund is not liquid, we may, at our discretion, offer investors the ability to redeem (wholly or partly) from the Fund but only if there are assets available that are able to be converted to cash to meet redemptions under the offer.

Redemption proceeds

We may pay the redemption proceeds on your units into a non-interest bearing trust account in order to facilitate payment of these amounts to your nominated account. If we are unable to credit your account for any reason these amounts may continue to be held in such a non-interest bearing trust account until you provide alternative payment instructions or we are required by law to pay these amounts to any regulatory body or other person or account.

Other important information about redemptions

We may compulsorily redeem your units where permitted or required by law or the constitution of the Fund.

If you submit your redemption request by facsimile or email, Macquarie may rely on the faxed or emailed redemption request to process your redemption. If Macquarie receives a redemption request by facsimile or email, you:

- acknowledge that there is potentially a greater risk that fraudulent facsimile or email instructions can be given by someone who has access to your account number and a copy of your signature(s) and that you accept such risks
- acknowledge that Macquarie may assume that the instruction has been sent, and is authorised, by or on behalf of you, and
- release Macquarie from, and indemnify Macquarie against all losses and liabilities arising from any payment or action taken by Macquarie based on any instruction bearing your account number and a signature that purports to be yours or that of an authorised signatory on the account, even if such instructions are not authorised (except to the extent that such losses and liabilities directly arise from the negligence or wilful default of Macquarie).

6.3 Confirmation of instructions

When you are instructing us in relation to the following:

- a redemption greater than or equal to \$1,000,000
- a redemption to an account which is not the pre-nominated bank account, even if it has the same account name as the pre-nominated bank account
- a redemption where there has been a change of bank account details from the original Application Form, or
- a change of authorised signatory/signatories,

we may contact an authorised signatory for the investment to confirm that the instruction is authorised. If we are unable to contact an authorised signatory for the investment, we may postpone the processing of the instruction until we have been able to make contact and confirm the instruction. Your instruction will not be treated as having been received by us until it has been confirmed, unless we determine otherwise.

6.4 Application and Redemption Cut-off times

Application and Redemption Cut-off times may be changed in certain circumstances including where the market for trading the assets of the Fund closes early (for example, Christmas Eve). Any changes to the Application and Redemption Cut-off times will be published on our website at macquarie.com.au/unit_prices.

6.5 Cooling-off period

If you are a retail client under the Corporations Act, you can terminate your investment in the Fund during the period of 14 days starting on the earlier of the time when you receive confirmation of issue of units in the Fund to you or the end of the fifth Business Day after the units are issued to you. Your refund will be processed as a redemption and the redemption value will be reduced or increased for market movements since your investment. We will also deduct any tax or duty that is paid or payable by the Fund, any reasonable administration or transaction costs incurred as well as the sell spread. As a result, the amount returned to you may be less than your original investment. To exercise your cooling-off rights, please write to Client Service.

6.6 Transferring units

You may transfer units in the Fund to another person by providing us with:

- a standard transfer form signed and completed by both you and the party receiving the units
- an Application Form accompanying the current PDS for the Fund duly signed and completed by the party receiving the units, and
- such other information and confirmations (including to comply with AML/CTF requirements) that we may request.

We reserve the right to decline transfer requests at our discretion (including because we have not received all requested information from you or the party to whom you propose to transfer your units).

A transfer of units involves a disposal of units, which may have tax implications. Stamp duty may also be payable on the transfer (including where there is a change in legal ownership but no change in beneficial ownership) unless an exemption applies. You should obtain tax and stamp duty advice before requesting a transfer.

6.7 Indirect investors

We consent to the use of this PDS by IDPS operators, such as master trusts, wrap accounts or nominee services that include the Fund on their investment menus. You may invest indirectly in the Fund as an 'indirect investor' through an IDPS by directing the IDPS operator to acquire units in the Fund on your behalf. An investment in the Fund through an IDPS operator does not entitle you to a direct interest in the Fund and you may be subject to different terms and conditions from those referred to in this PDS.

An indirect investor does not become a unitholder in the Fund. Accordingly, an indirect investor does not acquire the rights of a unitholder of the Fund or acquire any direct interest in the Fund. The IDPS operator acquires these rights and can exercise, or decline to exercise, them on your behalf according to the arrangements governing the IDPS. As an indirect investor, you will still have access to our dispute resolution process.

If you invest in the Fund through an IDPS, certain information in this PDS may not be relevant to you. This includes information relating to:

- minimum initial investment and additional investment amounts
- applications and application forms • redemptions and switches, and
- transferring units.

Your IDPS operator can provide you with the unit prices for your investment and any other terms and conditions that may apply to any investment you propose to make in the Fund through that IDPS operator. If you are investing through an IDPS, the net performance of your investment in the Fund may differ from the information we publish, due to cash flows specific to your portfolio and any fees charged by the IDPS operator. Fees and expenses, applicable to the IDPS (as set out in the IDPS offer document or client agreement), may be payable in addition to the fees and expenses stated in the PDS. Please contact your financial adviser or IDPS operator if you have any queries.

6.8 Incorrect addresses and facsimile numbers

You are responsible for ensuring that you send your application and redemption requests and any other correspondence to the correct address, email or facsimile number. If incorrect contact details are used, your request may be delayed or not processed.

We accept no responsibility for requests (including for applications and redemptions) that have been sent to an incorrect address, email or facsimile number, including addresses and facsimile numbers of other parts of the Macquarie Group that are not referred to in the PDS. Please contact Client Service if you would like to confirm our address, email or facsimile number.

7.1 Our legal relationship with you

Macquarie as the responsible entity

As the responsible entity of the Fund, we are responsible for the management and administration of the Fund. We hold an Australian Financial Services Licence (AFSL), authorising us to act as the responsible entity of the Fund. Details of our AFSL can be found on ASIC's website at www.asic.gov.au.

Our powers and duties in relation to the Fund are set out in the constitution, the Corporations Act and general trust law.

Constitution

The Fund is established by a constitution, as amended from time to time. The provisions of the constitution are binding on each investor and persons claiming through them, as if the investor or person were a party to the constitution. The constitution of the Fund contemplates that Macquarie may determine, agree, approve or consent to certain matters. Unless the constitution or the Corporations Act otherwise provides, we may do so in our absolute discretion and subject to such conditions (if any) as we determine.

This PDS contains a summary of some key features of the constitution. The constitution covers a number of additional matters, including:

- the nature of units (subject to any special terms of issue, identical rights attach to all units)
- how and when redemptions are paid
- unitholder meetings
- the circumstances in which we may be liable to you
- our indemnification out of the assets of the Fund for all costs incurred by us in relation to the administration or management of the Fund (subject to the proper performance of our duties)
- the circumstances in which we can terminate the Fund
- your rights to share in any Fund income, and how we calculate it, and
- when we can retire as responsible entity of the Fund.

We can amend the constitution from time to time, subject to the provisions of the constitution and the Corporations Act. We can amend the constitution without your consent if we reasonably consider that the amendments will not adversely affect investors' rights. Otherwise, we must obtain the approval of the required number of unitholders at a meeting of unitholders (a resolution may bind you, regardless of how or whether you vote). A copy of the Fund's constitution is available upon request by contacting Client Service.

Corporations Act

Our duties under the Corporations Act include:

- acting in the best interest of investors and, if there is a conflict between unitholders' interests and our own interests, giving priority to unitholders' interests
- ensuring that Fund property is clearly identified as Fund property, is valued at regular intervals and is held separately from our property and the property of any other fund, and
- reporting to ASIC any breach of the Corporations Act in relation to the Fund, which has had, or is likely to have, a materially adverse effect on the interests of unitholders.

We are liable for our agents engaged or appointed to provide services in connection with the Fund.

The compliance plan

We have prepared and lodged a compliance plan for the Fund with ASIC. The compliance plan sets out the compliance procedures that we will follow to ensure that we are complying with the Corporations Act and the Fund's constitution. Our compliance with the compliance plan is independently audited each year, as required by the Corporations Act and the auditor's report is lodged with ASIC.

Related party issues

In the execution of transactions, we deal with professional organisations that may include Macquarie Group Limited or its associated companies (**Macquarie Group**). All transactions are conducted on arm's length terms. We can also trade the Fund's investments with members of the Macquarie Group. These organisations may receive commissions at prevailing market rates for the execution of transactions. Any conflict of interest or potential conflict of interest is managed in accordance with our Conflict of Interest Policy.

The Macquarie Group is a global provider of banking, financial, advisory, investment and funds management services. The Macquarie Group acts on behalf of institutional, corporate and retail clients and counterparties around the world. Macquarie Investment Management Australia Limited, as responsible entity of the Fund and Macquarie Investment Management Global Limited, as the Cash Manager of the Fund, generally have no control over these activities. As a result, from time to time the Fund's activities may be restricted, for example due to regulatory constraints applicable to the Macquarie Group, and/or its internal policies designed to comply with such constraints.

In certain circumstances, statutory or internal Macquarie Group imposed restrictions may preclude the acquisition or disposal of securities by the Fund. Without limitation, this includes where the acquisition would cause the Macquarie Group's aggregated holdings in a company (including holdings that the Macquarie Group is required to aggregate) to exceed applicable takeover thresholds. In addition, where, due to such restrictions, there is limited capacity to acquire particular securities, the Fund will not have priority over any member of, or any other fund associated with, the Macquarie Group to acquire those securities. Such restrictions may result in an adverse effect on the value of the Fund's investments due to the Fund being unable to enter into positions or exit positions, as and when desired.

The provision of services by us (and other entities forming part of the Macquarie Group) in relation to the Fund is not exclusive and we or other members of the Macquarie Group may act as the responsible entity, trustee, investment manager or adviser for other funds or separate client accounts that have the same or similar investment strategies to the Fund.

Investing through a margin loan

If you invest in the Fund through a margin lender, units in the Fund will generally be held in the name of the margin lender or its nominee. Accordingly, you may not acquire the rights of an investor in the Fund and all correspondence and dealings in relation to the investment must generally be through your margin lender.

7.2 Keeping you informed

To keep you up to date on your investment in the Fund, we will provide or make available:

- transaction confirmations
- transaction statements at least annually
- an annual tax statement for Australian resident investors to assist in completing tax returns, and
- an annual financial report. The Application Form contains a number of options in relation to access to annual financial reports.

For the purposes of ASIC Regulatory Guide 240, the following will be made available or distributed to investors.

Type of information	Is the information available?	How often this information will be available?	Where can this information be accessed?
Actual allocation to each asset type	The Fund's gross exposures to each underlying asset type will be available.	Monthly	Fund performance report available on our website
Liquidity profile of the Fund's assets (that is, the estimated time required to sell an asset at the value ascribed to that asset in the Fund's most recently calculated net asset value)	Yes	Annually	Fund performance report for the period ending 30 June available on our website
Maturity profile of the Fund's liabilities	We do not provide this information because it is not relevant given the investment strategy of this Fund. In the ordinary course, we expect that the Fund's derivatives positions will be closed out before they reach maturity.	Not applicable	Not applicable
Fund's leverage ratio (after taking into account the leverage embedded in the assets of the Fund, other than listed equities and bonds)	Yes The initial margin to equity ratio will also be available.	Monthly	Fund performance report available on our website
Names of derivatives counterparties engaged by the Fund	Yes	Annually	Fund performance report for the period ending 30 June available on our website
Any changes (including changes in related party status) to any of the Fund's key service providers	Yes	Monthly	Fund performance report available on our website
Monthly or annual investment returns over at least a five-year period (or since its inception if a shorter period)	Yes	Monthly	Fund performance report available on our website
Fund's current total net asset value	Yes	Monthly	Fund performance report available on our website
Redemption value of a unit in the Fund	Yes	Monthly	Fund performance report available on our website
Net return on the Fund's assets after fees and costs but before taxes	Yes	Monthly	Fund performance report available on our website
Any material change in the Fund's risk profile, strategy and individuals playing a key role in making the investment decisions for the Fund	Yes	Monthly	Fund performance report available on our website

You are also able to access and view some account information online through our secure website. Register for this service by completing the 'Online Registration' form which you can download at [macquarie.com/onlineform](https://www.macquarie.com/onlineform).

Continuous disclosure documents

The Fund may be a disclosing entity for the purposes of the Corporations Act and subject to certain regular reporting and continuous disclosure obligations. Copies of documents lodged with ASIC in relation to the Fund may be obtained from, or inspected at, an ASIC office.

As an investor in the Fund, you have the right to obtain, free of charge, the following periodic documents (in printed or electronic form) from us for the Fund:

- the annual financial report (including financial statements) most recently lodged with ASIC, and
- any half-year financial report (including financial statements) lodged with ASIC or any continuous disclosure notices provided by us after the lodgement of the annual financial report and before the date of the Fund's PDS.

7.3 Protecting your privacy

We collect certain personal information from you, in order to administer your investment in the Fund. As required by law, we have adopted a Privacy Policy that governs the collection, storage, use and disclosure of personal information. A copy of our Privacy Policy is available from our website at macquarie.com.au/au/privacy_policy.htm

By signing the Application Form, you agree to us collecting, storing, using and disclosing your personal information in accordance with our Privacy Policy. This includes using your personal information for:

- processing your application
- providing or marketing products and services to you
- administration purposes, including managing, monitoring, auditing and evaluating the products and services
- determining future product and business strategies and to develop services, including the modelling of data and data testing
- ensuring compliance with all applicable regulatory or legal requirements (including the requirements of superannuation law). This includes the requirements of the Australian Securities and Investments Commission, the Australian Taxation Office, AUSTRAC and other regulatory bodies or relevant exchanges
- communicating with you in relation to your holding and all transactions relating to the holding, and
- providing products and services to you through other entities in the Macquarie Group, our agents, contractors or third parties whether or not located in Australia.

We collect and record personal information through our interactions with you and your nominated adviser(s), including by telephone, email or online. We may also collect personal information from public sources and third parties including information brokers and our service providers.

We aim to ensure that our record of your personal information is accurate, complete and up to date. If your personal information changes, inform us as soon as possible. You may correct or update this information by notifying us in writing.

Where you provide us with personal information about someone else you must first ensure that you have obtained their consent to provide their personal information to us based on this privacy statement.

We are required or authorised to collect your personal information under various laws including those relating to taxation and the AML/CTF Laws.

What happens if you do not give us information

You may choose not to give personal information about you to Macquarie. Depending on the type of personal information, the consequences set out below may apply if you do not do so:

- refer to 'Tax file number (TFN) and Australian Business Number (ABN)' in Section 5 of this PDS for the consequences if you do not supply your TFN or a valid exemption (or in certain cases an ABN)
- we may not be able to approve your application for units in the Fund, and
- we may not be able to provide you with an appropriate level of service.

Disclosing your information

You agree and consent that Macquarie may disclose information we hold about you in the following circumstances:

- to other companies in the Macquarie Group as well as our agents, contractors or service providers, which provide services in connection with our products and services, for example printing statements or notices which we send to you
- supplying information about your investments to any financial adviser that is nominated by you, or their dealer group
- to your agents and representatives (for example your broker, adviser, solicitor, accountant or superannuation fund administration) or any administrator, liquidator, trustee in bankruptcy, legal personal representative or executor, whether or not located in Australia
- disclosing your personal information to regulatory authorities (for example tax authorities in Australia and overseas) in connection with their lawful information requests or to meet our legal obligations in any relevant jurisdiction using your personal information to contact you on an ongoing basis (by telephone, electronic messages, online and other means) to offer you products or services that may be of interest to you, including offers of banking, financial advisory, investment, insurance and funds management services, unless you tell us not to
- disclosing your personal information to any person proposing to acquire an interest in our business
- if the disclosure is required or authorised by law, or
- if you consent.

In order to use and disclose your personal information for the purposes stated above, we may be required to transfer your personal information to entities located outside Australia (this includes locations in the Philippines and India and the countries specified in our Privacy Policy). By completing the Application Form, you consent to your personal information being transferred overseas for these purposes.

Direct marketing

We and other companies in the Macquarie Group may use your personal information to contact you on an ongoing basis by telephone, electronic messages (like email), online and other means to offer products or services that may be of interest to you including offers of banking, financial, advisory, investment, insurance and funds management services, unless you change your marketing preferences by contacting us.

If you have any questions in regards to your privacy or to request access to your personal information that we hold, contact us on 1800 814 523 or email privacy@macquarie.com.

Complaints

If you wish to complain about any breach or potential breach of our privacy obligations, you should contact us. If you are unhappy with our response, you are entitled to contact the Office of the Australian Information Commissioner who may investigate your complaint further.

7.4 Representations

We have not authorised any person to give any information, or to make any representation about the Fund, which is not in the PDS and, if given or made, such information or representation must not be relied on as having been authorised by us. Any other parties distributing the Fund are not our agent or representative and are doing so on their own behalf. We are not responsible for any advice or information given, or not given, to you by any party distributing the Fund and, to the maximum extent permitted by law, accept no liability whatsoever for any loss or damage arising from you relying on any information that is not in the PDS.

7.5 Enquiries and complaints

You may contact your financial adviser or Client Service if you have any enquiries or complaints. If you have a complaint, please contact us and we will do our best to resolve any matter quickly and fairly. Written complaints can be sent to us at:

The Complaints Officer

Macquarie Investment Management Australia Limited
PO Box R1723
Royal Exchange NSW 1225 Australia

If you make a complaint, we will assess your complaint and advise you of the outcome within 45 days of receiving your complaint.

If you are an individual or small business and you are not satisfied with the outcome of your complaint or how the complaint was handled, you may refer the complaint to the:

- Macquarie Customer Advocate, who will review the reasonableness and fairness of the outcome of your complaint, or
- Australian Financial Complaints Authority (AFCA), an independent external dispute resolution body approved by ASIC.

If you request the Customer Advocate to carry out an independent review of your complaint and are not satisfied with the outcome, you can still raise your complaint with AFCA.

The Macquarie Customer Advocate can be contacted at:

The Customer Advocate

Macquarie Group Limited
PO Box R1723
Royal Exchange NSW 1225 Australia

Email: customeradvocate@macquarie.com
Telephone: 1800 898 307

Please include the following information in your correspondence:

- your investor number and complaint reference number
- your preferred contact details, and
- a brief description of your complaint.

AFCA can be contacted at the details below. Please quote our membership number, 14922.

Australian Financial Complaints Authority

GPO Box 3
Melbourne VIC 3001 Australia

Email: info@afca.org.au
Telephone: 1800 931 678

7.6 Consents

IPM Informed Portfolio Management AB

IPM has given its written consent to the statements about it and its employees and officers appearing in this PDS in the form and context in which they appear (and has not withdrawn that consent before the date of this PDS).

IPM Global Macro Fund Application Form

Issued by Macquarie Investment Management Australia Limited (**Macquarie**) ABN 55 092 552 611 AFSL 238321
Dated 1 July 2020

This is the Application Form for the IPM Global Macro Fund (**Fund**).

This Application Form is contained in the Product Disclosure Statement for the Fund (**PDS**). The PDS contains important information about investing in the Fund. You should read the PDS before making a decision to invest in the Fund.

Information in the PDS may change from time to time. Where information that changes is not materially adverse to investors, we may update this information by updating the relevant document or by publishing an update at macquarie.com.au/pds.

You can access a copy of the latest version of the PDS, any updated information and the Application Form free of charge from our website or by contacting us.

The information provided in the PDS is general information only and does not take account of your personal financial situation or needs. You should obtain your own financial advice tailored to your personal circumstances.

If you are an existing investor in the Fund and would like to make an additional investment in the Fund, please see the PDS for details.

Accounts can only be opened by the following types of investors:

- individuals over 18 years of age
- trustees of other entities
- companies or incorporated bodies
- associations/cooperatives, or
- government entities.

You are required to complete this Application Form and send it to us with any required certified copies of your identification documents by mail, facsimile or email. If you fax or email your identification documentation to us, we may request certified copies of the originals to follow in the mail for our records and your account may not be opened until they have been received. If you are not one of the types of investors listed above, please contact Client Service.

! Refer to page 18 for the instructions and checklist for completing this Application Form.

Macquarie is subject to the Anti-Money Laundering and Counter-Terrorism Financing Act 2006 (Cth) (**AML/CTF Laws**). To comply with AML/CTF Laws, we must collect certain information about each investor as set out below. If you do not have the identification documentation referred to, please contact Client Service for other acceptable identification documentation.

Macquarie may disclose your personal information in connection with AML/CTF Laws. In certain circumstances, Macquarie may be obliged to freeze or block an account where it is used in connection with illegal activities or suspected illegal activities. Freezing or blocking can arise as a result of Macquarie's account monitoring obligations under the AML/CTF Laws. If this occurs, Macquarie is not liable to you for any consequences or losses whatsoever and you agree to indemnify Macquarie if it is found liable to a third party in connection with the freezing or blocking of your account.

Documents in a language other than English must be accompanied by an English translation prepared by an accredited translator.

! Refer to 'How to certify your documents' on page 19 for more information.

To contact Macquarie Investment Management Client Service, call **1800 814 523** or **61 2 8245 4900** 8.30am to 5.30pm (Sydney time) Monday to Friday or email mim.clientservice@macquarie.com.

You can also write to us at **PO Box R1723, Royal Exchange, NSW 1225 Australia** or fax us at **61 2 8232 4730**.

The instructions and checklist to help you complete this Application Form are located on page 19. Please use black ink and complete the applicable sections in BLOCK LETTERS.

1 Do you have an existing Macquarie Investment Management account?

Are you an existing client with Macquarie Investment Management?

☐ Yes ☐ No

! Note if you answered 'Yes', you are still required to complete this Application Form in full.

My existing 5-digit investor number is

! Your 5-digit investor number can be located on your statements.

! If you are an existing investor and complete this Application Form using the same name (or substantially the same name as we determine) for the investment as your existing account(s), we will link this new account with your existing account(s), as determined by Macquarie. This means that your contact and address details provided in this Application Form will be applied to all your accounts which are linked.

STATEMENT

For the period 05/11/2014 to 20/11/2014

Account Name: Mary Smith ATF Smith Family Trust

Investor Number: 87170

2 Details of individuals (including directors of proprietary companies and trustees)

! All individuals, including directors of proprietary companies and trustees, are required to complete this section.

- ☐ Cross this box if settlor is deceased.
- ☐ Cross this box if the initial contribution was less than \$10,000.
- ☐ Cross this box if same as 'Individual 1' in Section 2.1.
- ☐ Cross this box if same as 'Individual 2' in Section 2.2.
- ☐ None of the above. Please complete below.

Title Full given name(s)

Surname

5

Fund and distribution method

What is the purpose of investment? (Select all applicable options)

☐ Savings ☐ Growth ☐ Income ☐ Retirement ☐ Business account

Other (specify)

Detail the source of your investment amount (Select all applicable options)

☐ Savings ☐ Growth ☐ Income ☐ Retirement ☐ Business account

Other (specify)

Fund name	APIR code	Minimum initial investment	Fund code	Investment amount (must be at least the 'Minimum initial investment')	Distribution options ¹ (select one option only)	
					Reinvest	Deposit into nominated financial institution
IPM Global Macro Fund	MAQ8243AU	\$20,000	IPM	\$		

¹ Nominate one distribution option. If no nomination is made, distributions will be re-invested.

6

Payment of initial investment amount

Please indicate how you will make your payment of the initial investment amount by selecting one of the following:

☐ Bank transfer (EFT or RTGS)

You will be able to deposit the amount when you receive a confirmation of your account details (Investment Account) once your application has been accepted.

☐ Cheque

Make cheque payable to 'MIMAL – IPM Global Macro Fund A/C [Full investor name]'.

☐ Direct debit

Complete Section 7C to enable us to debit your nominated bank account once your application has been accepted. Generally, application money paid by direct debit can take up to four Business Days before the amount is invested but may take longer in certain circumstances. Please ensure that your financial institution allows direct debits on your nominated account and that funds are available from the time that your application form is submitted. Macquarie may not be able to issue units immediately after receipt of your application money.

7

Nominated bank accounts

Please provide your bank details for redemptions and distributions. Complete Section C if you have selected to pay your initial investment amount by direct debit.

- !** Distribution and redemption proceeds can only be paid into an account with, and direct debit requests can only be made from, an Australian financial institution. This account must be in the investor's name. Payment to, or direct debit from, a third party bank account is not permitted. For example, if you are applying as a corporate trustee for a trust, the bank account name must include the name of the trust.

A. Payment of redemption proceeds (this is mandatory)

Name of financial institution

Direct debit authority

- !** If the account nominated above is a joint bank account, both account holders must sign below. If it is a company account and the company has more than one director, two directors or a director and a secretary must sign below.

If the account nominated above is to be used to debit any initial investment amount, fees or charges, or other amount incurred or payable in connection with my/our investment in the Fund(s), I/we, the applicant and the account holder(s) named above, authorise and request you, Macquarie Investment Management Australia Limited ABN 55 092 552 611 (User ID number 320152) (**Macquarie**), until further notice in writing, to debit my/our account described above with any amounts which Macquarie may properly debit or charge me/us through the direct debit system.

By signing this direct debit request, I/we acknowledge and agree:

- to be bound by the terms of the 'Direct debit request service agreement' in Section 12 of the Application Form
- that my/our bank/financial institution may, in its absolute discretion:
 - determine the order of priority of payment by it of any moneys pursuant to this request or any authority or mandate, and
 - at any time by notice in writing to me/us, terminate this direct debit request as to any future debits
- Macquarie may, by prior arrangement and advice to me/us, vary the amount or frequency of future debits.

C. Trust

i. If individual trustee(s)

- ☐ Either trustee that has executed this Application Form to sign
☐ Both trustees that have executed this Application Form to sign
☐ Other, please provide details

Name

Signature

ii. If corporate trustee(s)

Refer to requirements for 'Company (Domestic/Foreign)' listed above.

8.2 / (Optional) Additional authorised signatories, including financial advisers

This is optional. To nominate additional authorised signatories, please complete below and cross to select what nominated authorised signatories are authorised to do on your behalf. If you have nominated your financial adviser, ensure they complete Section 10.

Signatory 1

The authorised signatory nominated below may:

- ☐ Make changes to my/our contact details only.
☐ Make enquiries (including changes to authorised signatories); make changes to the my/our contact details and make applications and withdrawals on my/our behalf.

Name

Signature of authorised signatory 1

Signatory 2

The authorised signatory nominated below may:

- ☐ Make changes to my/our contact details only.
☐ Make enquiries (including changes to authorised signatories); make changes to the my/our contact details and make applications and withdrawals on my/our behalf.

Name

Signature of authorised signatory 2

! Please note that applications made by an authorised signatory of the investor will be governed by the terms of investment (which will include the PDS, trust deed or constitutions) current at the time of the application.

► Please attach additional pages for additional authorised signatories.

9

Correspondence preferences

A. Please cross below to elect how your correspondence should be distributed. If you have a financial adviser, ensure they complete Section 10.

☐ Investor only ☐ Investor and adviser ☐ Adviser only

B. Annual financial reports

☐ Cross to receive an electronic copy of the annual report for each financial year.

☐ Cross to receive a hard copy of the annual report for each financial year in the post.

If you do not make an election, a copy of the latest financial report for the Fund will not be sent to you. You will be able to download these reports at macquarie.com.au/financial_statements.

C. Would you like an additional third party recipient, other than your financial adviser, to receive communications including periodic statements regarding your account?

☐ Yes, please complete the section below.

☐ No, if you have a financial adviser ► **go to Section 10**. If not, ► **go to Section 11**

Macquarie Online

Do you have a Macquarie Access Code (MAC) for online services?

- ☐ Yes, my MAC is
- ☐ No. Please complete the 'Online Registration Form' to request a MAC. Download the form at [macquarie.com/onlineform](https://www.macquarie.com/onlineform) or contact us. The full terms and conditions are available on the website.

By signing this Application Form, I declare that my dealer group is lawfully authorised to advise on, and deal in, the financial product offered in the PDS under an AFSL.

- Please complete and enclose a copy of the relevant Financial Services Council/Financial Planning Association of Australia Identification Form (**FSC/FPA Form**) in relation to the applicant referred to in this Application Form.
- By signing below and submitting the FSC/FPA Form with this Application Form, you declare to Macquarie that you:
 - have followed the FSC/FPA Industry Guidance Note No.24 and any other application guidelines and laws with respect to the Anti-Money Laundering and Counter-Terrorism Financing Act 2006 (Cth) (**AML/CTF Laws**)
 - will make available to Macquarie, on request, original verification and identification records in respect of the applicant, being those records referred to in the FSC/FPA Form
 - will provide details of the customer identification procedures adopted by you in relation to the applicant
 - have kept a record of the applicant's identification and verification and will retain these in your file for a period of seven years after your relationship with the applicant has ended
 - will use reasonable efforts to obtain additional information from the applicant if Macquarie requests you to do so
 - will not knowingly do anything to put Macquarie in breach of AML/CTF Laws, and
 - will notify Macquarie immediately if you become aware of anything that would put Macquarie in breach of AML/CTF Laws.

Signature Date / /

Client acknowledgement

For each investment in the Fund

- i. I/We have received, read and understood the PDS for the Fund (as may be updated from time to time) to which my/our application relates and the terms and conditions of the Direct Debit Request Service Agreement contained in Section 12, and agree to be bound by the terms of the PDS and the Direct Debit Request Service Agreement.
- ii. I/We agree to be bound by the constitution of the Fund (as amended from time to time).
- iii. If I/we have received the PDS from the internet or other electronic means, I/we declare that it was received either personally or a printout was accompanied by the Application Form before making an application for units in the Fund.
- iv. I/We will not knowingly do anything to put Macquarie in breach of the Anti-Money Laundering and Counter-Terrorism Financing Act 2006 (Cth) and related rules (**AML/CTF Laws**). I/We will notify Macquarie if I/we are aware of anything that may put Macquarie in breach of AML/CTF Laws.
- v. If requested, I/we will provide additional information and assistance, and comply with all reasonable requests to facilitate Macquarie's compliance with AML/CTF Laws in Australia or an equivalent overseas jurisdiction.
- vi. I/We undertake that I/we are not aware and have no reason to suspect that:
 - the money used to fund the investment is derived from or related to:
 - money laundering, terrorism financing or similar activities
 - illegal activities, and
 - proceeds of investment made in connection with the Fund will fund illegal activities.
- vii. I/We confirm that I/we have provided all information required and that the information is accurate, complete and up to date.
- viii. I/We confirm that, if I/we have applied through a financial adviser who has completed the FSC/FPA Identification Form, I/we have provided all information required in that form and that information is accurate, complete and up to date.
- ix. I/We agree that by providing Macquarie with my/our email address, I/we consent to Macquarie corresponding with me/us via email, unless I/we notify Macquarie otherwise.
- x. I/We agree to personal information about me/us being collected, used and disclosed in accordance with Macquarie's Privacy Policy and the privacy statement in the Information Booklet, including direct marketing.
- xi. If I/we am/are a trustee, I/we am/are authorised under the trustee deed of the trust to apply for, and hold, units in the Fund.
- xii. I/We agree:
 - that the representations set out in the preceding paragraph are made by me/us on the date on which I/we sign this Application Form and on each day thereafter until the termination of the Fund
 - to promptly notify Macquarie of any change in circumstance which would cause the representations and warranties set out above to be incorrect or misleading.
- xiii. If we are a custodian, we confirm that we are authorised by our client to give the undertakings above on behalf of our client.
- xiv. Other than Macquarie Bank Limited (**MBL**), none of the entities noted in this document are authorised deposit-taking institutions for the purposes of the Banking Act 1959 (Commonwealth of Australia). The obligations of these entities do not represent deposits or other liabilities of MBL. MBL does not guarantee or otherwise provide assurance in respect of the obligations of these entities, unless noted otherwise.
- xv. I/We agree that Macquarie may send notices, communications and disclosures to me/us by post or electronically by email and/or by posting the notice, communication or disclosure on the Macquarie website.
- xvi. I/We agree to access communications, notices and disclosures on the Macquarie website. Communications, notices and disclosures will be taken to have been received by me/us upon posting of the communication, notice or disclosure on the Macquarie website.
- xvii. Where my adviser has completed Section 10 of the Application Form, I/we authorise Macquarie to disclose details of my investment in the Fund(s) to the adviser and the adviser's dealer group.
- xviii. I/We acknowledge and agree that if we selected a direct debit for the initial investment amount, that if Macquarie is not able to issue units immediately after receipt of my/our application money, the money may be paid into a non-interest bearing trust account with an authorised deposit-taking institution.
- xix. I/We confirm and make the declarations set out in Section 7 Direct Debit Request, if we selected a direct debit to pay the initial investment amount.

Client acknowledgement (continued)

Use of facsimile or email

If I/we submit my/our Application Form by facsimile or email, Macquarie may rely on the faxed or emailed Application Form to process and accept my/our application.

For each investment in the Fund, if Macquarie receives instructions by facsimile or email in relation to my/our investment in the Fund, I/we:

- acknowledge that there is potentially a greater risk that fraudulent instructions can be given by someone who has access to my/our account number and a copy of my/our signature(s) and that I/we accept such risks
- acknowledge that Macquarie may assume that the instruction has been sent, and is authorised, by or on behalf of me/us, and
- release Macquarie from, and indemnify Macquarie against all losses and liabilities arising from any payment or action taken by Macquarie based on any instruction bearing my/our account number and a signature that purports to be mine/ours or that of an authorised signatory on the account, even if such instructions are not authorised (except to the extent that such losses and liabilities directly arise from the negligence or wilful default of Macquarie).

You should read the PDS before signing this Application Form.

Before signing this Application Form, you should ensure that this is the latest version of the Application Form. Please refer to macquarie.com.au/pds. Please note that applications may be delayed or not accepted if an outdated Application Form is used. You should also ensure that you have received all 19 pages of this Application Form and completed all relevant pages. If the other pages of this Application Form are not attached to this page or have not been completed correctly, you should contact us or your financial adviser.

12

Direct Debit Request Service Agreement

Between You and Us.

1. Definitions

The following definitions apply in this agreement.

Account means the account held at Your Financial Institution from which We are authorised and able to arrange for funds to be debited.

Agreement means this Direct Debit Request Service Agreement between You and Us.

Business Day means a day other than a Saturday or a Sunday or a public holiday in New South Wales.

Constitution means the constitution of the Fund in which You invest.

Debit Day means the day when a debit is made by Us.

Debit Payment means a particular transaction where a debit is made.

Direct Debit Request means the Direct Debit Request between Us and You set out in the Application Form included in or accompanying the PDS.

Fund means one or more trusts offered by Us under a PDS to which this Agreement is incorporated by reference.

Our, Us or We means Macquarie Investment Management Australia Limited ABN 55 092 552 611, which You have authorised by signing a Direct Debit Request.

PDS means the document to which this Agreement is incorporated by reference and which sets out the terms of the offer of the Fund.

You or Your means the person(s) who signed the Direct Debit Request.

Your Financial Institution is the financial institution where You hold the Account that You have authorised Us to arrange to debit.

By completing the 'Direct debit request' section of the Application Form, you are authorising the responsible entity with the ability to debit your nominated accounts and transfer the amount you request to your investment. This agreement sets out the terms and conditions on which you authorise us to deduct from your account with your financial institution any amounts that become payable to an investment with us.

2. Debiting Your Account

- 2.1 By signing the Application Form that contains the Direct Debit Request, You have authorised Us to arrange for funds to be debited from Your Account. You should refer to the Direct Debit Request, this Agreement, and the Constitution for the terms of the arrangement between Us and You.
- 2.2 We will only arrange for funds to be debited from Your Account as authorised in the Direct Debit Request.
- 2.3 If the Debit Day falls on a day that is not a Business Day, We may direct Your Financial Institution to debit Your Account on the preceding Business Day.
- 2.4 If You are unsure about when the Debit Payment will be or has been debited from Your Account, please check with Your Financial Institution.

3. Changes by Us

- 3.1 We may stop or cancel the Direct Debit Request at any time by giving You at least fourteen days written notice.

4. Changes by You

- 4.1 Subject to clause 4.3, You may change the arrangements under a Direct Debit Request by contacting Us.
- 4.2 You may request Us to stop or defer a Debit Payment by giving us written notice within 24 hours of Our receipt of the Direct Debit Request. We will notify You if Your request to stop or defer a Debit Payment has been approved.
- 4.3 Before You can cancel Your Direct Debit Request, You must notify Us and make other arrangements for the particular Debit Payment to be made by another method. If You cancel Your authority for Us to debit Your Account and do not make alternate arrangements to make payment to Us, then You may be in breach of the Constitution.

5. Your obligations

- 5.1 Direct debiting may not be available on all accounts. You should check Your Account details against a recent statement from Your Financial Institution and, if uncertain, contact Your Financial Institution before completing the Direct Debit Request.
- 5.2 It is Your responsibility to ensure that there are sufficient clear funds available in Your Account on the Debit Day to allow a Debit Payment to be made in accordance with the Direct Debit Request.
- 5.3 If there are insufficient clear funds in Your Account to meet a Debit Payment:
 - a) you may be charged a fee and/or interest by Your Financial Institution
 - b) you may also incur fees or charges imposed or incurred by Us as stated in the Constitution
 - c) you may be in breach of the Constitution, and
 - d) you must arrange for the particular Debit Payment which has been declined to be made by another method or arrange for sufficient clear funds to be in Your Account by an agreed time or times so that We can process the Debit Payment.
- 5.4 You should check Your Account statement to verify that the amounts debited for Your Account are correct.
- 5.5 If We are liable to pay goods and services tax (GST) on a supply made by Us in connection with this Agreement, then You agree to pay Us on demand an amount equal to the consideration payable for the supply multiplied by the prevailing GST rate.

6. Dispute

- 6.1 If You believe that there has been an error in debiting Your Account, You should notify Us directly and confirm that notice in writing with Us as soon as possible so that We can resolve Your query quicker. All queries should be directed to Us in the first instance so that We can attempt to resolve the matter between Us and You.
- 6.2 If We conclude as a result of Our investigations that Your Account has been incorrectly debited We will respond to Your query by arrangement for Your Financial Institution to adjust Your Account accordingly. We will also notify You in writing of the amount by which Your Account has been adjusted.
- 6.3 If We conclude as a result of Our investigations that Your Account has not been incorrectly debited We will respond to Your query by providing You with reasons and any evidence for this finding.

Direct Debit Request Service Agreement (continued)

- 6.4 If We cannot resolve Your query You can still refer it to Your Financial Institution which will obtain details from You of Your query and may lodge a claim on Your behalf.
- 6.5 We shall not be liable under any circumstances for any indirect or consequential loss or any loss of profits suffered by you as a result of any action or any failure to act by Us under this Agreement.
- 6.6 Subject to conditions and warranties implied by legislation and to any express terms in this Agreement, We are not responsible or liable for any delay, interruption or error in processing or failing to process any Direct Debit Request whether or not caused (including as a result of negligence) by Us or Our employees or agents.
- 6.7 All terms implied by statute, general law or custom shall not apply to this Agreement except ones that may not be excluded. If We breach any condition or warranty implied by legislation in a contract with a consumer, Our liability for that breach is limited to a resupply of the services in respect of which the breach occurred.

7. Confidentiality

- 7.1. We will keep any information (including Your Account details) in Your Direct Debit Request confidential. We will make reasonable efforts to keep any such information that We have about You secure and to ensure that any of Our employees or agents who have access to information about You do not make any unauthorised use, modification, reproduction or disclosure of that information.
- 7.2. We will only disclose information that We have about You:
 - a) to the extent specifically required by law, or
 - b) or the purposes of, or in connection with, the exercise of any of Our rights and/or powers under, this Agreement or the Constitution (including disclosing information to Macquarie Bank Limited, as sponsor bank, in connection with a claim made on it relating to an alleged incorrect or wrongful debit or disclosing information in connection with any query or claim).

8. Notice

- 8.1 If You wish to notify Us in writing about anything relating to this Agreement, You should write to Our client service team.
- 8.2 We will notify You:
 - a) by sending a notice in the ordinary post to the address You have given Us in the Application Form to the PDS, or
 - b) by sending a notice electronically to the email address You have given Us in the Application Form to the PDS.
- 8.3. Any notice will be deemed to have been received two Business Days after it is posted (if the notice is sent by ordinary post) and on the same Business Day as it is e-mailed (if the notice is sent electronically). Execution by You of the Application Form that contains the Direct Debit Request deems You to have read and understood the terms of this Direct Debit Request Service Agreement.

Instructions and checklist for completing this Application Form

You are required to send the completed Application Form and required identification documentation to us by mail, facsimile or email. If you fax or email your identification documentation to us, we may request certified copies of the originals to follow in the mail for our records and your account may not be opened until they have been received.

How to certify your documents

A certified copy is a document that has been certified as a true copy of an original document. To certify a document, take the original document and a photocopy to one of the people listed in the categories below and ask them to certify that the photocopy is a true and correct copy of the original document. That person will need to print their name, date and the capacity in which they are signing (eg postal agent, Justice of the Peace). The date of the certification should be no more than six (6) months old at the time you lodge the Application Form. If the certified documents are dated more than six months prior to the date you lodged your Application Form, we may not be able to proceed with your Application Form.

Sample wording

I, **[full name]**, a **[category of persons listed below]**, certify that this **[name of document]** is a true and correct copy of the original.

[Signature and date]

Documents in a language other than English must be accompanied by an English translation prepared by an accredited translator.

Who can certify copies of documents?

Financial corporations (bank, building society, credit union)	<ul style="list-style-type: none"> • Officer with two or more continuous years of service with one or more financial institutions (for the purposes of the Statutory Declaration Regulations 1993 (Cth)) • Finance company officer with two or more continuous years of service with one or more finance companies (for the purposes of the Statutory Declaration Regulations 1993 (Cth)) • Officer with, or authorised representative of, a holder of an Australian financial services licence, having two or more continuous years of service with one or more licensees
Post office	<ul style="list-style-type: none"> • Permanent employee of the Australian Postal Corporation with two or more years of continuous service who is employed in an office supplying postal services to the public • Agent of the Australian Postal Corporation who is in charge of an office supplying postal services to the public
