Investment strategy

The Trust generally gains its exposure to a diversified portfolio of investments through a mix of investment managers.

The conservative nature of the Trust provides a greater exposure to defensive assets, such as fixed interest, cash and alternative defensive with a moderate exposure to growth assets, such as property, Australian and international shares and alternative growth.

A mix of passive, factor-based and active investment managers may be selected to manage the assets of the Trust providing differing yet complementary investment styles to achieve more consistent excess returns.

The Trust is authorised to utilise approved derivative instruments for risk management purposes and investment efficiency. Please note that derivative instruments cannot be used to gear the Trust's exposure.

The underlying managers may utilise strategies for the management of currency exposure. It is the strategy of the Trust that international currency exposure may be hedged. The Trust has the capacity to change the level and nature of any currency overlay or allocation to underlying managers to manage currency risk.

Notes to the trust profile

- 1 The total estimated ongoing annual fees and costs includes the management fee, indirect costs, net transaction costs and any performance fees (shown if applicable). These costs are subject to change from time to time and may vary depending on changes to the composition of the underlying assets, changes in exposure to underlying investment managers and where any unusual or non-recurrent expenses are incurred. Please refer to the latest PDS and www.ioof.com.au for full details on fees and costs.
- 2 Performance is net of management costs and expenses. Performance is based on exit price to exit price for the period and assumes that all distributions are reinvested. Management costs and other expenses are accounted for in the exit price. Past performance is not a reliable indicator of future performance.
