Investment strategy

IOOF MultiSeries 70 (Trust) gains its exposure to a diversified portfolio of investments through a mix of investment managers.

The growth nature of the Trust provides a greater exposure to growth assets, such as property, Australian and international shares and alternative assets, with a moderate exposure to defensive assets, such as fixed interest and cash.

A mix of passive, factor based and active investment managers may be selected to manage the assets of the Trust providing differing yet complementary investment styles to achieve more consistent excess returns.

The Trust is authorised to utilise approved derivative instruments for risk management purposes and investment efficiency. Please note that derivative instruments cannot be used to gear the Trust's exposure.

The underlying managers may utilise strategies for the management of currency exposure. It is the strategy of the Trust that international currency exposure may be hedged. The Trust has the capacity to change the level and nature of any currency overlay or allocation to underlying managers to manage currency risk.

Quarter highlights

- The Australian shares portfolio underwent a restructure as a result of greater scale from ANZ funds.
- Two new active managers were appointed being Quest and Northcape. As a result, three managers were terminated being State Street, Yarra Capital and Invesco.
- Diversified fixed interest portfolio outperformed, with all underlying managers except Ardea outperforming their benchmarks. Western, Stone Harbor, Brandywine and Janus Henderson performed particularly well.
- Alternatives portfolio also outperformed, with solid performance from private debt manager, Metrics.
- The Australian equities portfolio underperformed with Acadian small caps and Northern Trust underperforming.
